Re: Permits No. 67-14370 and 67-14380

Dear Ms. Gibson:

We are requesting a change on our permits to not require measuring devices.  
The source of water is a limited supply from springs, which dry up by early summer.

We have waited until now to make the request as we felt it was necessary for the watermaster to see the flow of water in the spring. In the fall, water is not flowing and the watermaster would not have been able to see the process of the delivery of spring water and the amount of water available for our permits.

We have been in contact with Joe Stippich and have requested he review our water permits and address our request for NO measuring devices in a letter to you.

If you need anything further, please let us know.

Sincerely,

Leslie Davis
