FORM 113
12/07

I hereby assert the following:

a) Diversion is from a surface water source to which the livestock would otherwise have access. The land where the watering tanks or troughs will be located is land from which the livestock had access to the source of water from which diversion is being made.

b) The diversion of water out of the stream as described in this notice is for watering livestock and will not injure other water rights.

c) I will not alter the bed and banks of the source as the term is defined in section 42-3802, Idaho Code. I understand that I may place an inlet conduit into the source in a manner that does not require excavation or obstruction of the stream channel, unless the director of the department of water resources approves a stream channel alteration permit for additional work.

d) I understand that upon determination of interference with other water rights, the Director may order curtailment of diversion or use of water under this notice or may require the diversion and delivery system to be modified to prevent injury.

e) I will not divert more than 13,000 gallons per day for livestock watering from this diversion, and I will not use more than one point of diversion under this notice.

f) I am authorized to make the changes described in this notice and that if the notice involves a federal grazing allotment, the permitee consents to the changes described in this notice.

g) I understand that any willful misrepresentation on this notice will void any right to divert water for livestock under this notice.
