Re: (2) Applications for Transfer of Water Rights – Christie A. Haugh.

Dear Allen:

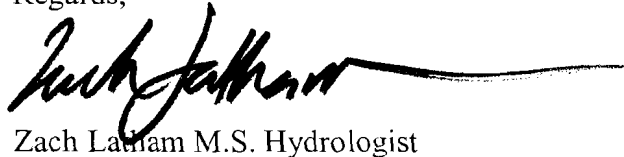

Enclosed please find two applications for transfer in the name of Christie A. Haugh. The first application for transfer involves ground water right 37-113F and surface water right 37-21299. Recommended surface water right 37-21299 lists a source of Townsend Gulch Creek, and is appurtenant to 3.7 acres at Ms. Haugh's residence. This transfer seeks to move all (8.1 acres) of ground water irrigation water right 37-113F from its recommended place of use, to Ms. Haugh's property in Townsend Gulch, Blaine County, and to create a 21.76 acre permissible place of use on her property. Ms. Haugh recently purchased ground water right 37-113F (see attached sale agreements). Ms. Haugh has an easement agreement with her neighbor to the east, Mr. Bob Christensen, to drill a new well on his property and install a pipeline from the well, across his property to serve the irrigation system at her residence. Ms. Haugh has an irrigation pond which she uses to pump water from to irrigate her residence. Because the area of the proposed PPU exceeds the number of acres sought to be irrigated after the approval of this water rights transfer application, combined limits of any kind should not be imposed on either water right listed above.

The second application for transfer involves recommended ground water irrigation right 37-7745D, appurtenant to 10.0 acres at a different property of Ms. Haugh's and surface irrigation water right 37-21300 in the name of Mr. Christensen. Recommended surface water right 37-21300 lists a source of Townsend Gulch Creek and is appurtenant to 3.7 acres at Mr. Christensen's residence. This application for transfer seeks to split and move 6.7 acres of 37-7745D, to Mr. Christensen's property; he recently purchased a portion of water right 37-7745D (see attached sale agreement). Ms. Haugh would like to retain the remaining 3.3 acres at its current recommended place of use. This application for transfer also seeks to create a 19.3 acre place of use on Mr. Christensen's property in order to use water rights 37-7745D (split portion) and 37-21300 to irrigate more efficiently on the property. Because the area of

the proposed place of use exceeds the number of acres sought to be irrigated after the approval of this water rights transfer application, combined limits of any kind should not be imposed on either water right listed above. Ms. Haugh has signed this application for transfer (although it is in Mr. Christensen's name) as was stipulated on Article VI, 6.1, Agreement for purchase and sale of water right between Ms Haugh and Mr. Christensen. All pertinent sale agreements, tax notices and property deeds are included with these two applications for transfer.

Attached is a limited power of attorney document covering all water rights owned by Ms. Haugh so that with her consent, our office may make changes in the future to any of these applications if necessary. Also attached is a check for \$350.00 dollars to cover the processing fee for the two water right transfer applications. Please copy our office on all correspondence regarding these two water right transfer applications and don't hesitate to give me a call with questions or comments. Thanks for your time and have a great day.

Regards,

A handwritten signature in black ink, appearing to read 'Zach Latham', followed by a long horizontal line extending to the right.

Zach Latham M.S. Hydrologist
