RE: Application for Transfer

Dear Applicant(s):

The Department of Water Resources has received your application for transfer. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

The easement agreement/deed is 22 years old, does not appear to be recorded, identifies no legal description of where the easement pertains and the Abrams no longer own any tract of ground in the area.

The current tax lot information from Bannock County indicates that current place of use for the most part is in the name Robin Valley Estates. We need information that you still own this property.

We will also need approval from the Water District to move your point of diversion to another location, a pump in the Garden Creek and an indication of why this wont injure the other water users on Garden Creek and in the ditch you would be leaving.

The map of the new place of use, still shows that you would be irrigating part of lot 4, Robin Valley Estates, even though you provided a plat map with the statement that Water rights were withheld from that lot.

Please feel free to contact this office if you have any questions.

Sincerely,

Eastern Region IDWR
