Attention: Steve Lester, Water Rights Supervisor

Subject: Eagle Sport Legends Development, LLC
Ground Water Right Application

Dear Mr. Lester:

Attached please find:

1. An Application for Permit executed by Providence Development Group, LLC
2. A Check in the amount of \$250.00 for the Permit
3. An Application for Transfer of Water Right executed by the Canyon County Water Co. LTD
4. A Check in the amount of \$250.00 for the Transfer

The reason for the Permit and Application is the ponds for the Middleton Lakes Subdivision development located in Middleton, Idaho. The Permit is for the aesthetic storage of 134 AFA in a series of six ponds and is being filed by the subdivision developer, Providence Development, LLC.

The Transfer is to account for the change in the nature of use of 12.9 acres from agricultural irrigation to ground water recharge of the surface water right held by Canyon County Water Company, LTD, in which company the Applicant for Permit holds 96.3 shares. The Canyon County Water Company LTD has executed the Transfer after review by their legal counsel.

Please review the application to determine if it is complete. If the application is complete, would you please send a letter to the affect that IDWR has received the applications for water rights and required water transfer in conjunction with the ponds at Middleton Lakes Subdivision. The developer needs such a letter as evidence to the City that it is resolving the water rights issues associated with the ponds.

If you have any questions or require additional information please contact me.

Sincerely,
Stanley Consultants, Inc.

Brian Iverson, P.E./L.S.
Senior Engineer
