Re: permit correction

In the final review before issuing this license, it was discovered that the rate and volume I had determined for the irrigation use was incorrect. Irrigation of 3.2 acres is limited to 0.10 cfs ($3.2 \times 0.03 = 0.096$ cfs., rounded up) not 0.3 cfs.

August 11, 2008, the president of the homeowners association (Arrow Point Community Association Inc) signed an amendment to add commercial use to the permit. The irrigation use on that amendment is listed as 0.3 cfs.

The Bureau Chief decided that a correction to the permit would not further delay this license. I made the necessary change and applied it to the amendment which will be signed concurrently with this license. Therefore the amendment that was signed by the homeowners association in Aug 2008 differs by that one aspect from the amendment signed in June 2009.
