Subject: RE: Licensing of permit 36-8763 for the City of Paul--Update

Allen,

I completed my review on this License last week, and should have details from Cindy and Richard Rau today. When I reviewed the field inspection, due to limited space in the pump house and not having the required distances, a totalizing meter had not been installed. During the field inspection, other measures were taken to calculate the flow. I have completed an Order to waive the totalizing meter requirement, upon hearing back from Cindy and Richard. As soon as the Order is signed, the License is ready to be reviewed and signed.

Allen,

Sandy is working on the license. I think she's almost done. The only issue seems to be non-compliance with the totalizing meter requirement in the permit. I asked her to talk with Cindy about whether its needed. If not, we can issue an order waiving the requirement. Otherwise, the city may need to comply first.

Shelley,

As you may know I attended the "Capitol for a Day" in Paul today.

At that meeting I was approached by Representative Bert Stevenson inquiring about the City of Paul's getting their permit licensed. Apparently the mayor of the city was asking Mr. Stevenson for some help since apparently they have inquired at the state office already or some time ago and the license has not been issued. I told Mr. Stevenson that I did not know of any specific issue why the license was not being issued or if there was a specific problem other than the fact that most IDWR work effort is being focused on processing transfers with licensing being backlogged for the time being. Mr. Stevenson indicated that he would contact the state office directly.

I thought you might want to know since you will likely be responding to the inquiry.

Allen
