RE: P/U Shape Update for 63-9661

IDL oversees use of this right for various "clients" such as the Idaho Botanical Garden etc. The recent license described a PPU but with a specific 27.5 acre shape within the PPU. A license condition was included to require the right holder to provide a new shape whenever changes occurred within the boundary.

IDL provided the attached update to satisfy that condition. Please contact Dean Johnson at 334-3488 if there are any questions.
