There is a **FILING FEE of \$50.00** to be included with this form when filed with IDWR.

Permit No. 11-7491 Date Proof is Due: 1 May 2009

Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

Two wells contemplated under Permit No. 11-7481 and 11-7491 have been drilled and are operational.
In addition, a large storage tank on the property has been installed, and the main water service line
running throughout the development has been installed. However, water lines off the main line have not
been completed, in particular, to phases 6, 7, and 8 of the development. Additional time is necessary to
complete the installation of the water system. Costing \$ \$4.45 Million

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

The large scope of the system and subdivision, coupled with the limited construction season, and recent
down turn in the housing market and U.S. economy has caused delays in the installation of water system.

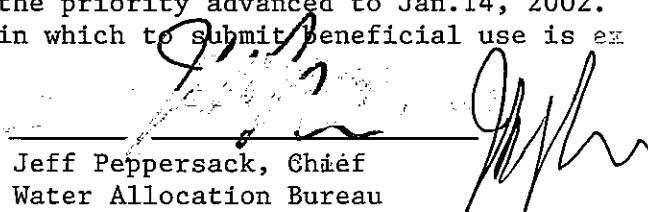

Permit holder(s) request an extension to 1 May 2014
