we plan on irrigating from this well
with our permit # 72-16699 raising

4. Does the well presently exist? ☒ Yes ☐ No
If not, when is the well to be drilled? _____

Please Note: Low Temperature Geothermal Well drilling permits can only be granted after the owner has secured and shown evidence of a bond for the well and a drilling prospectus has been submitted by the owner and driller and approved by the Department. Any requests for waivers or exemptions to the above must be in writing to the Department and approved prior to the start of construction.

5. Anticipated Driller Harber drilling
All wells drilled in Idaho must be drilled by an Idaho licensed driller. The Department must be notified of the driller prior to start of well construction.

6. Please describe why:

- A. There is no feasible alternative use of the thermal resource.

- B. There is no economically viable alternative source of cold water.

We have already spent a large amount
of money drilling a well to irrigate. If
we drill another well there is still the
same chance of hitting hot water again.

- C. This exemption, if granted, is in the public interest.

NOTE: This exemption cannot be granted if the foregoing information is incomplete, inaccurate, or if any portion of the State Statutes have not been complied with in regard to the development and use of this resource.
