Re: Permit 63-31183 DRAFT Annual Report for Comment

Dear Michele,

Thank you for meeting with me and John Chapman to discuss the information contained in your analysis of the approved Request for Extension of Time for the above noted Permit. This is Micron's understanding of your expectations for the Annual Report. We would appreciate your review and comment, and await your contact to schedule a tour of the project.

Sincerely,

Re: Water Right Permit 63-31183 DRAFT Annual Report

Dear Mr. Peppersack,

Attached please find the DRAFT Annual Report of local area water level hydrographs, recharge and diversion volumes as required under condition #9 of Water Right Permit 63-31183. Analysis of this data indicates continued stabilization and minor improvement in water level in the deep aquifer as a result of Micron's efforts to stabilize or reduce net diversions in the immediate area of the project.

Please contact Brian Brown at (208) 368-3304 if you have any questions.

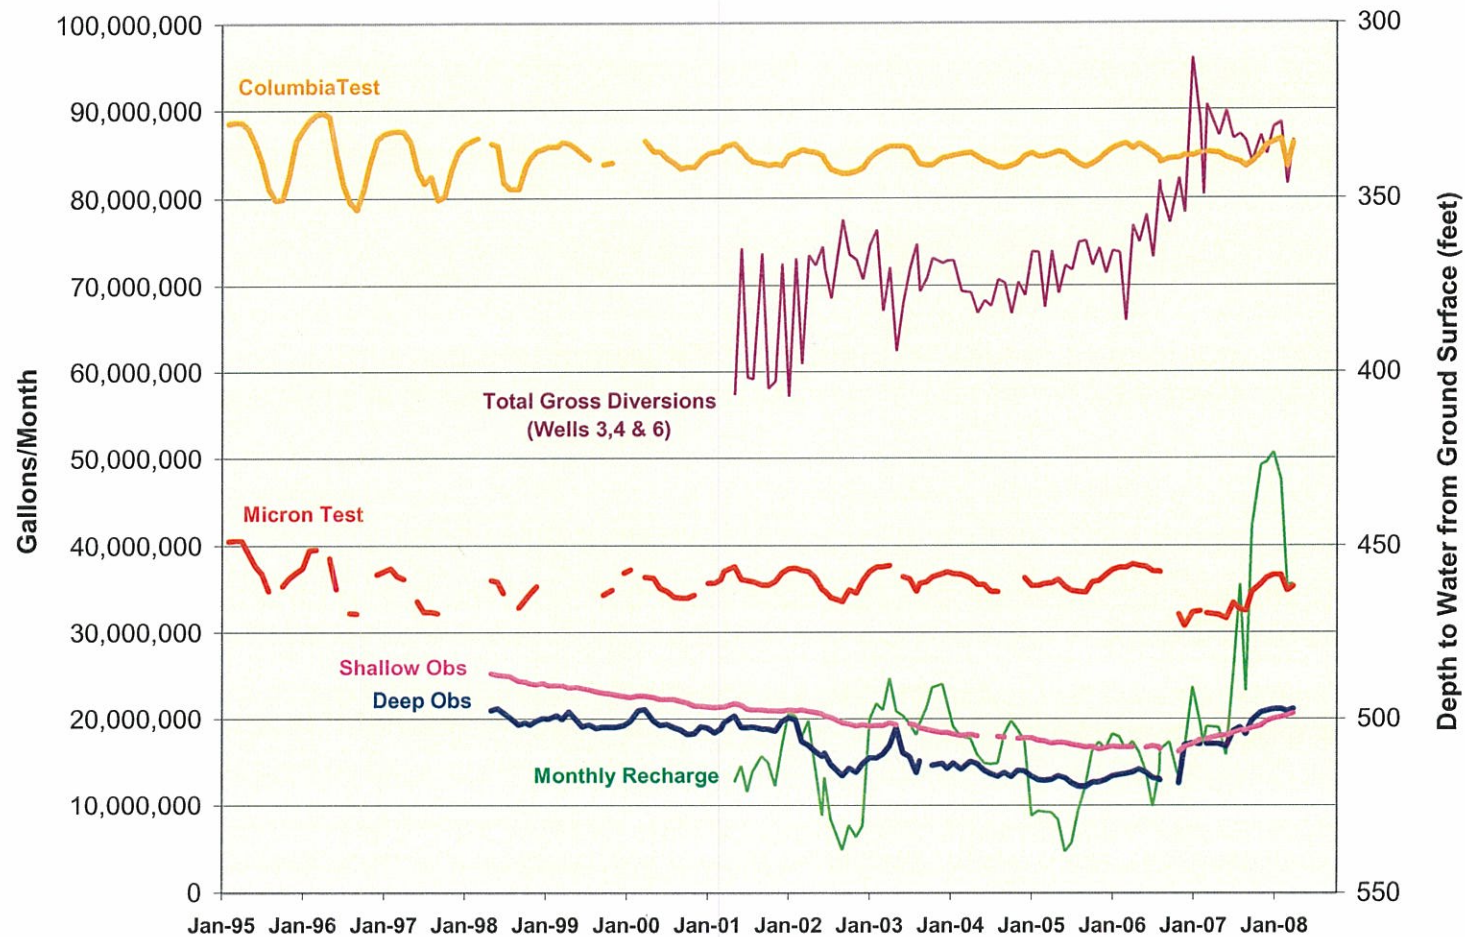

Sincerely,

Marty Lindgren
