Transfer 73711 involves adding 26.7 acres purchased from another farm and moving this water into the KECO PPU of 8627.4 acres. Additionally it involves the 5 dairy future dairy sites and straightens up the location of the sites and the individual water right of each site. Note that transfers 75283 and 75290 were created not as a single transfer but as two since WorkFlow could not handle so many rights and wells all at one time. Transfer 75283 deals with approximately 1/2 of the rights on the KECO farm. The rights chosen are related in that many have combined limits. Transfer 75290 deals with the remaining rights on the KECO farm as well as dealing with the rights on the BLM and BOR tracts and pulling in an enlargement right 36-16582 missed by an earlier transfer of the Commons property. Near final review it was discovered that one BLM tract had two rights 36-7611A and 36-7830A served by one of the 29 wells. These lands are adjacent to the KECO PPU.

It is understood that once these approvals are issued that some water and acres may be moved by future transfers from the Storm Circle farm and Mainline farm also owned by Western Mortgage and Realty Co. to balance out acres actually farmed within the various PPUs of these three farms.
