DEPT. OF WATER RESOURCES
SOUTHERN REGION

Upon approval of this transfer of ground water rights to the Devries Dairy. They will drill a new well with the site located at a proposed new barn several hundred feet to the south of the existing well house. (See photo) Acting as a backup to the other well.

The proposed use for this 35 AF is stock water and commercial. With 600 head milking and 200 dry cows.

The nutrient management plan for this herd indicates milk cows use 30 gallons a day with heifers at 10-17 gallons per day.

Stan Haye
