WATER RESOURCES
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of Applicant Gusman Livestock Company, Inc. Phone 208-583-2361
Mailing address PO Box 211, Jordan Valley, OR 97910 Email _____
2. Source of water supply groundwater which is a tributary of _____
3. Location of point of diversion is Township 5S Range 5W Sec. 11, in the NE $\frac{1}{4}$,
SE $\frac{1}{4}$, Govt. Lot _____, B.M., Owyhee County;
additional points of diversion if any: _____
4. Water will be used for the following purposes:
Amount 0.02 cfs for Stockwater * purposes from 5/1 to 10/15 (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) 0.02 and/or (b) _____
cubic feet per second acre feet per year
6. Proposed diverting works:
a. Describe type and size of devices used to divert water from the source Myers T57 series 1/2 HP well pump

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet;
total reservoir capacity _____ acre-feet
c. Proposed well diameter is 4 inches; proposed depth of well is 205 feet
d. Is ground water with a temperature of greater than 85°F being sought? no
e. If well is already drilled, when? 12/15/97; Drilling firm Hiddleston & Son, Inc.
Well was drilled for (well owner) Kinross DeLamar Mining Co; Drilling Permit No. D0000280
7. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
a. Hydropower; show total feet of head and proposed capacity in kW. _____
b. Stockwatering; list number and kind of livestock. 100 beef cattle
c. Municipal; show name of municipality. _____
d. Domestic; show number of households. _____
e. Other; describe fully. _____

9. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
5S	5W	11													S				

Total number of acres to be irrigated: NA

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? No other rights

11. a. Who owns the property at the point of diversion? Gusman Livestock Company, Inc
b. Who owns the land to be irrigated or place of use? Gusman Livestock Company, Inc
c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: NA

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Equip an existing monitoring well with a submersible pump (Myers 1.5 HP T57 series Model S2J52) to provide stockwater for cattle grazed seasonally in the area. The well is in place as a monitoring well used by lessee and per agreement, right of usage for stockwater will be to landowner, Gusman Livestock Company (applicant). The water source is groundwater from a perched system not believed to be connected to the regional aquifer. The well pump will feed a 5000 gallon storage tank. The stored water in the tank will feed stock tanks with a float control valve.

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½"x11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. (A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.)

BE IT KNOWN that the undersigned hereby makes this application for permit to appropriate the public waters of the State of Idaho as herein set forth.

RE: Application for Permit No. 2-10408 & 55-13882

Dear LEGAL NOTICE DEPARTMENT:

Enclosed you will find a legal notice which we wish to have published in your newspaper on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 06/08/2009. Your cooperation is appreciated.

Sincerely,

Denise Buffington
Administrative Assistant

The following application(s) have been filed to appropriate the public waters of the State of Idaho:

55-13882

GUSMAN LIVESTOCK CO
PO BOX 211
JORDAN VALLEY OR 97910

Point(s) of Diversion NESE S11 T05S R05W OWYHEE County Source GROUND WATER

Use: STOCKWATER 01/01 To 12/31 0.02 CFS

Total Diversion: 0.02 CFS

Date Filed: 07/18/2008

Place Of Use: STOCKWATER

T05S R05W S11 NESE

Permits will be subject to all prior water rights. Protests may be submitted based on the criteria of Sec 42-203A, Idaho Code.

Any protest against the approval of this application must be filed with the Director, Dept. of Water Resource, Western Region, 2735 Airport Wy, Boise ID 83705 together with a protest fee of \$25.00 for each application on or before 06/08/2009. The protestant must also send a copy of the protest to the applicant.

RE: Kinross/Gusman Livestock Water Right Application 55-13882

Attached is a letter addressed to me from Kinross regarding the use of well no. D0000280 for livestock watering. I have discussed converting an existing monitoring for use as a water supply well with Kinross officials previously. I am not aware that there are any statutory provisions specific to converting or re-designating a monitoring well as a production well. One concern related to re-designation of a monitor well for permanent use as a water supply well relates to Rules for well construction standards. Monitoring wells are not subject to as stringent a standard of construction as other production wells, since they are generally intended for short term use and will be properly abandoned.

I have reviewed the well log for well no. D0000280, and see that this well was constructed with steel casing in the upper 125 feet and completed above ground. Assuming that the well construction has not changed or been altered from what the well log shows, I feel that the construction of the well meets an adequate standard to be used as a source of water for livestock as proposed. Obtaining a water right that recognizes and records a specific association with this well seems to be a good way to document and legitimize re-designating use of this well. Please proceed with processing this water right application.

RE: Stock Water Right Application

Dear Mr. Whitney:

With this letter is an application for a stock water right Kinross DeLamar Mining Company (KDMC) has prepared on behalf of the landowner (Gusman Livestock Company, Inc) of property that KDMC has leased. By the terms of the lease agreement, KDMC is to make available a monitoring well on the leased property and equip a stock water system to be supplied from the monitoring well.

Attached is the Well Driller's Report for this well (D0000280). This report shows that well construction meets the requirements for a stock well.

From KDMC records it appears that the well will draw groundwater from a perched aquifer not believed to be connected to the regional system. The use will be seasonal while cattle are being grazed in the area.

The stock water system will consist of the well equipped with a 1.5 hp submersible pump and a nominal 5,000 gallon storage tank that will be filled periodically as needed. The storage tank will feed stock tank(s) with flow controlled by a float control valve. The pump will be powered by a generator.

Please contact me if you have questions or if additional information is needed to approve the attached application for permit.

Sincerely,

Larry Perino
Reclamation Manager
