

Ident. No. 63-33031

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of Applicant Jim Stephens Phone (208)-870-0495
Mailing address 100 S. Short Road Email _____
2. Source of water supply Groundwater which is a tributary of Boise River
3. Location of point of diversion is Township 4N Range 1W Sec. 15, in the NW $\frac{1}{4}$,
NW $\frac{1}{4}$, Govt. Lot _____, B.M., Ada County;
additional points of diversion if any: Pioneer Ditch Co. Headworks, NE1/4, NW1/4, Lot 3, Sec. 14, T 4N, R 1W, Ada
4. Water will be used for the following purposes:
 Amount 10.8 ac-ft for Aesthetic Storage purposes from 01/01 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) _____ and/or (b) 10.8
 cubic feet per second acre feet per year
6. Proposed diverting works:
 - a. Describe type and size of devices used to divert water from the source N/A
 - b. Height of storage dam N/A feet; active reservoir capacity 10.8 acre-feet;
total reservoir capacity 12.7 acre-feet
 - c. Proposed well diameter is N/A inches; proposed depth of well is N/A feet
 - d. Is ground water with a temperature of greater than 85°F being sought? No
 - e. If well is already drilled, when? N/A; Drilling firm N/A;
Well was drilled for (well owner) N/A; Drilling Permit No. N/A
7. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
 - a. Hydropower; show total feet of head and proposed capacity in kW. _____
 - b. Stockwatering; list number and kind of livestock. _____
 - c. Municipal; show name of municipality. _____
 - d. Domestic; show number of households. _____
 - e. Other; describe fully. Aesthetic Storage Pond

RECEIVED

APR 14 2008

WATER RESOURCES
WESTERN REGION

9. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
4N	1W	15						J											J

Total number of acres to be irrigated: N/A J - Aesthetic

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? None

11. a. Who owns the property at the point of diversion? The applicant
- b. Who owns the land to be irrigated or place of use? The applicant
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: N/A

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. See Narrative.

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½"x11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. (A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.)

BE IT KNOWN that the undersigned hereby makes this application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Narrative

Applicant: Jim Stephens

This application is being submitted to the Idaho Department of Water Resources (Department) to request a permit for the use of groundwater for aesthetic storage on property owned by the Applicant. The Applicant seeks to appropriate 10.8 acre-feet of ground water that will naturally fill one excavated pond for use as aesthetic storage. The Applicant does not seek to divert groundwater from the pond. The Applicant proposes use of surface water delivered pursuant to existing shares in the Pioneer Ditch Company Ltd. to mitigate evaporative losses from the pond.

The property is located south and adjacent to Moon Valley Road and north and adjacent to the Pioneer Canal as illustrated on Figure 1. Also shown on Figure 1 are the points of diversion for groundwater that will naturally fill the excavated pond and function as aesthetic storage, where the points of diversion are taken to be the center of the pond.

Excavation of the pond will eliminate 1.0 acres of agricultural lands and expose groundwater to the effects of evaporation. Irrigation water currently delivered to the Property by the Pioneer Ditch Company will be used to mitigate for the consumptive losses associated with evaporation of groundwater from the pond. This mitigation will occur by not diverting 1.0 acres worth of ditch shares and leaving those ditch shares in the Boise River for mitigation. The individual pond is a closed system that is subject to naturally occurring seasonal variations in groundwater levels.

Specific Application Items

3. Location of Point of Diversion

The proposed point of diversion for groundwater that will naturally fill the excavated pond to become aesthetic storage is located within Township 4 North, Range 1 West, Section 15, Boise Meridian, Ada County, Idaho. The point of diversion for aesthetic storage is the anticipated geometric center of the pond surface which is within the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$, of Section 15.

4. Water will be used for the following purposes:

The Application seeks the right to store, for purposes of aesthetic storage, up to 10.8 acre-feet of groundwater that will naturally fill the excavated pond. The request for 10.8 acre-feet is based on the storage volume in the anticipated geometry of the pond. Specifically, the pond surface area is expected to be no more than 1.0 acre with side slopes at approximately 2:1 (horizontal to vertical) and average depth of 25 feet as shown on Figure 1. From preliminary pond design the total pond volume is estimated to be 12.7 acre-feet. The volume of the proposed pond can be seen in Figure 1. The pond will be excavated below natural grade and no dams are expected to be required along the perimeter of the pond to retain stored groundwater.

6a. Describe type and size of devices used to divert water from the source.

The aesthetic storage right requested in this Application will be "diverted" from shallow alluvial groundwater as a consequence of pond excavation. That is, groundwater will naturally fill the pond up to existing water table levels after pond excavation.

6b. Height of storage dam, active reservoir capacity and total reservoir capacity.

The pond will be excavated below natural grade and will, therefore, not be constructed as a typical reservoir with a dam to support storage levels above natural ground. Accordingly, Item #6b lists 12.7 acre-feet for both active and total storage in the excavated pond below existing ground. This total storage volume is slightly higher than the 10.8 acre-feet aesthetic storage due to the fact that the proposed pond will have some freeboard designed into it for safety measures.

8e. Description of proposed uses.

As explained in the preceding narrative, 10.8 acre-feet of "aesthetic storage" is requested to represent the groundwater that will naturally fill the excavated pond and function as an aesthetic water amenity for the property.

11a. Who owns the property at the point of diversion?

The Applicant owns the property at the points of diversion for aesthetic storage.

11b. Who owns the land to be irrigated or place of use?

The Applicant currently owns the place of use for aesthetic storage.

12. Remarks.

Mitigation Plan:

The consumptive uses of groundwater arising from evaporative losses from the pond will be mitigated by no longer diverting from the Boise River an equal amount of water that was historically delivered to the property and used for irrigation. Specifically, one

(1) ditch share held in the name of the Applicant and authorized for diversion of 0.02-cfs from the Boise River for irrigation under the parent Pioneer Ditch Company, Ltd. water right 63-183 will be left in the Boise River without diversion. The 0.02-cfs of mitigation water equates to 1.0-acre of irrigation water historically diverted from the Boise River and used to irrigate a highly consumptive crop including pasture grass on the Applicant's property. Upon approval of this Application, the mitigation water will offset evaporative losses from 1.0-acre of pond surface.

The Applicant requests that the Department document the mitigation water by revising 0.02-cfs of the Pioneer Ditch Companies water right (No. 63-183) from the existing irrigation use to mitigation use with the understanding that mitigation is considered a valid beneficial use and affords protection of the 0.02-cfs of mitigation water from forfeiture by reason of not diverting the water from the Boise River. Attached is a letter from the Pioneer Ditch Company to the Department indicating their approval of the mitigation plan and consent to leave 0.02-cfs of mitigation water in the Boise River without diversion at the Pioneer Ditch Company's headworks.

The Applicant requests that the 1870 priority date associated with the proposed 0.02-cfs of water used for mitigation be recognized as a condition of approval of the permit. Specifically, the Applicant requests that diversion of groundwater from the pond for evaporative pond losses be administered with an 1870 priority pursuant to the 1870 priority of the mitigation water that is part of the parent Pioneer Ditch Company water right.

Re: Application for Water Right Permit
Applicant: Jim and Tammy Stephens

To Whom It May Concern:

The Pioneer Ditch Company Limited (PDC) confirms that there are 3.5 assessed ditch shares in good standing and appurtenant to property owned by the Jim and Tammy Stephens (Stephens) located in Section 15, Township 4 North, Range 1 West, Boise Meridian, Ada County. PDC also confirms that each ditch share is sufficient for one acre of irrigation and diverted at the rate of 1 miner's inch per acre (0.02 cfs per acre), consistent with the Idaho Department of Water Resources' (IDWR) adjudication recommended right report for Water Right No 63-183 that confirms a total of 25.72 cfs for irrigation of 1283.1 acres within the PDC boundary.

Stephens has requested of the PDC to use 1 existing ditch share in its name, represented by 0.02 cfs of PDC Water Right No. 63-183, to mitigate consumptive use associated with evaporation of water from a pond with approximately 1 acre of surface area. PDC understands that use of 0.02 cfs of Water Right No. 63-183 for mitigation requires that PDC leave 0.02 cfs in the Boise River without diversion. PDC further understands that mitigation is recognized as a valid beneficial use by IDWR and will not subject the 0.02 cfs to forfeiture by reason of not diverting the water.

PDC supports Stephens mitigation plan to the extent that, if IDWR approves Stephens application for permit, PDC agrees to not divert 0.02 cfs from the Boise River and consents to Water Right No. 63-183 being administratively modified by IDWR in the absence of a transfer application to convert 0.02 cfs from irrigation to mitigation.

Sincerely,

Mr. Bruce Gorton, President
Pioneer Ditch Company, Limited
PO Box 70
Star, ID 83669

Star, ID 83669

Re: Request for Use of Existing Ditch Shares for Evaporation from Pond

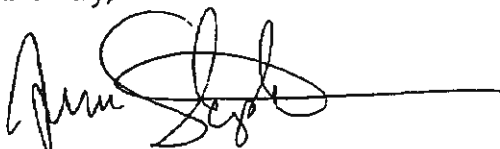

To Whom It May Concern:

This letter requests approval from the Pioneer Ditch Company (PDC) for Jim and Tammy Stephens (Stephens) to use 1 of their existing 3.5 ditch shares as part of an application to the Idaho Department of Water Resources (IDWR) to offset consumptive uses associated with evaporation of water from an excavated pond with 1 acre of surface area.

IDWR is requiring that Stephens apply for a permit for the groundwater water stored in the pond and that they mitigate for those consumptive uses. The mitigation plan to be submitted to IDWR with Stephens application will propose that 0.02 cfs, represented by 1 of our 3.5 existing ditch shares issued by PDC pursuant to Water Right No. 63-183, be left in the river by PDC, that is, not diverted at the PDC headworks on the Boise River. If Stephens mitigation plan is approved by PDC and IDWR, then IDWR will administratively change 0.02 cfs of the PDC Water Right No. 63-183 from the existing irrigation use to mitigation use. It is the Stephens understanding that IDWR considers mitigation as a valid beneficial use that will afford protection of the 0.02 cfs from forfeiture by not diverting it from the Boise River.

Stephens is requesting that the Pioneer Ditch Company consent to the use of 0.02 cfs of Water Right No. 63-183, as represented by one ditch share in Jim and Tammy Stephens name, for mitigation upon approval of their application by IDWR. To indicate your approval, please sign the attached letter addressed to IDWR and return the letter with your original signature to Jim Stephens, so that we can include it in our application to IDWR.

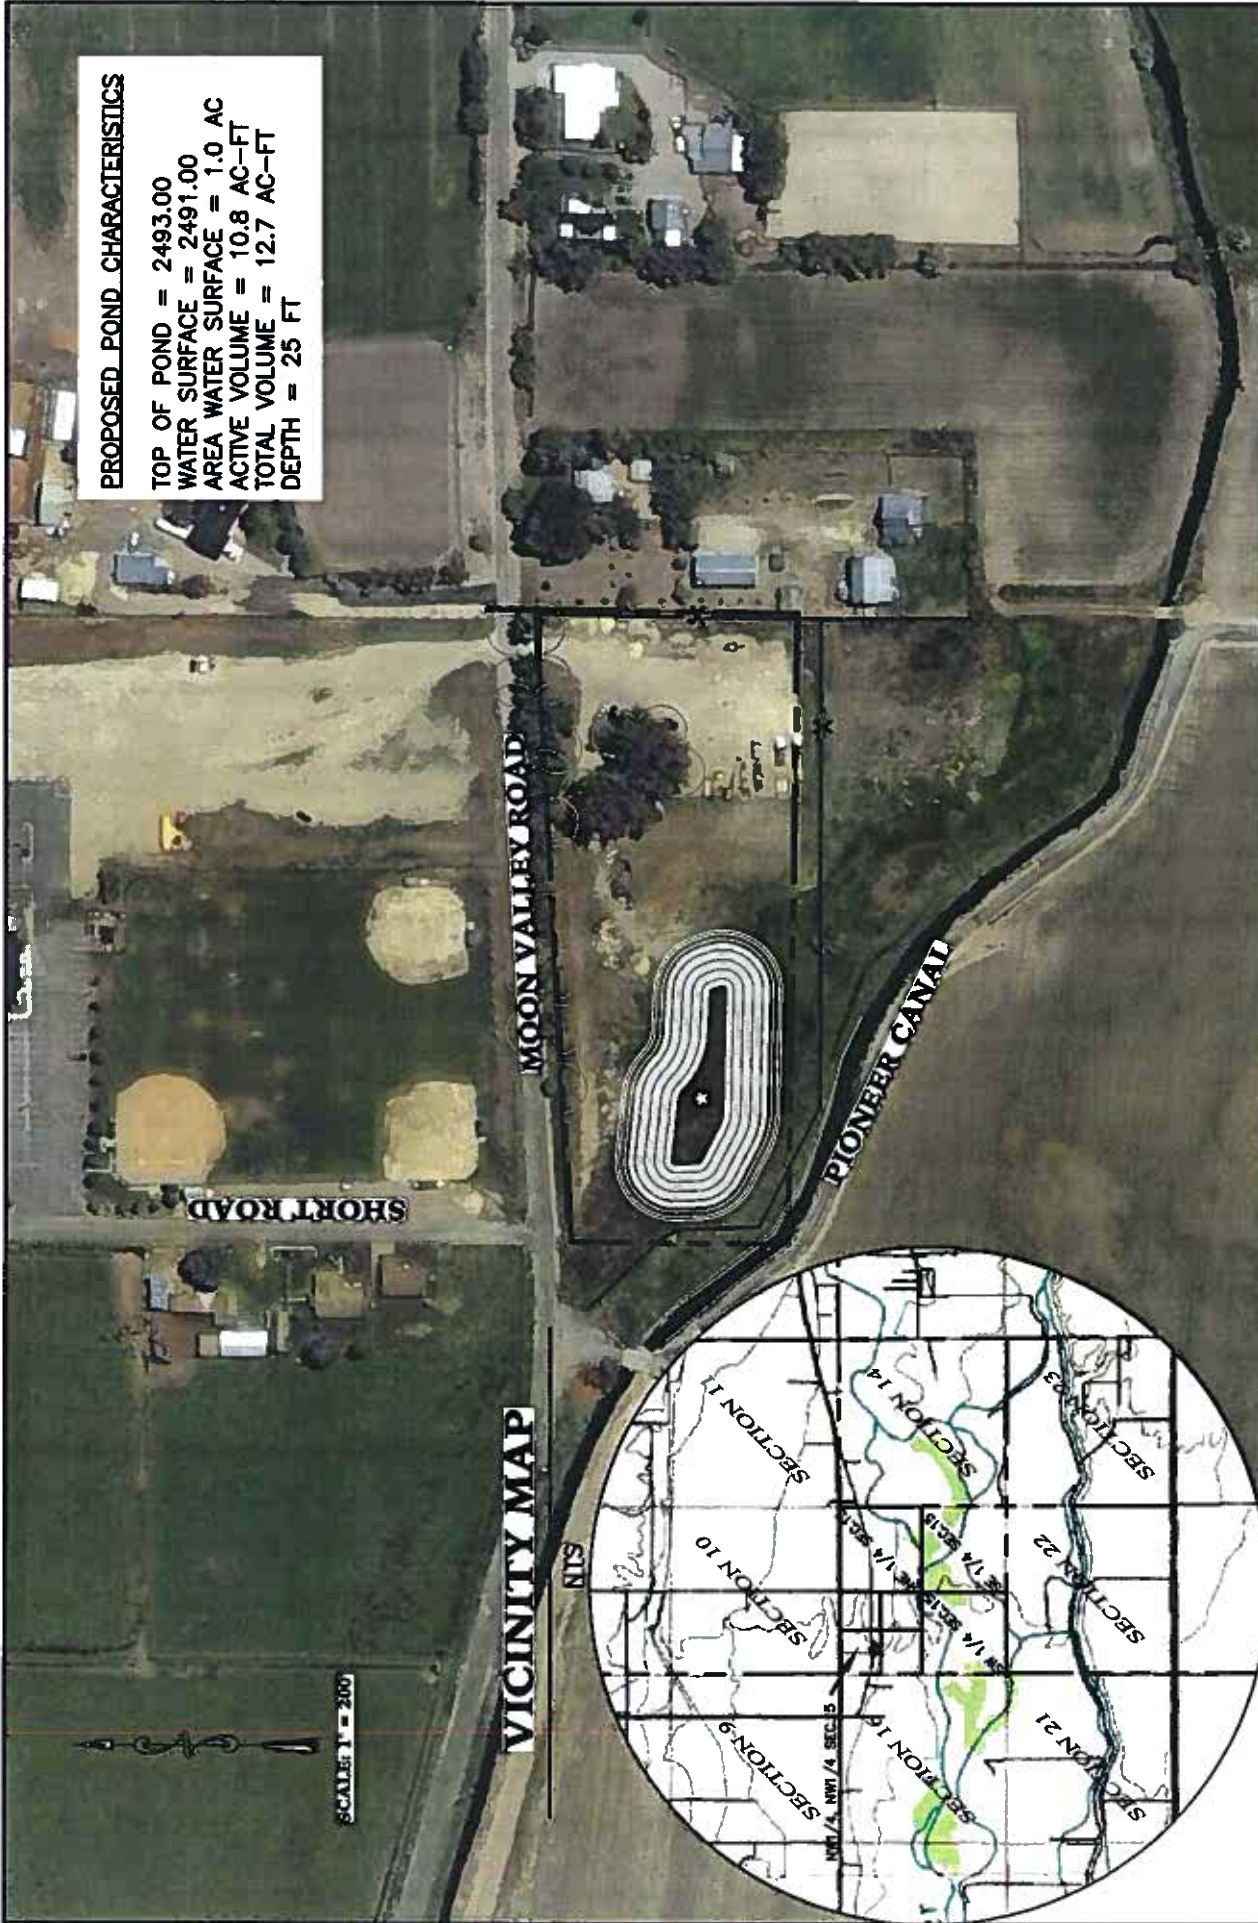

Sincerely,

Jim Stephens

Hi Rex –

This application is assigned to me for processing so Denise forwarded your email to me. You asked how the Dept will handle mitigation for evaporation and if the applicant has Pioneer shares.

IDWR requested and the applicant submitted a mitigation plan for the evaporative loss which proposed to retire an acre of irrigation. The irrigation water is provided by Pioneer Ditch shares and Pioneer agreed to the plan. If you have additional questions about this application, shoot me an email or give me a call.

Thanks-
 Vicky Music

The following application(s) have been filed to appropriate the public waters of the State of Idaho:

63-33031

JIM STEPHENS
100 S SHORT RD
EAGLE ID 83616

Point(s) of Diversion NWNW S15 T04N R01W ADA County Source GROUND WATER
Tributary to BOISE RIVER

Use: AESTHETIC STORAGE 01/01 To 12/31 10.8 AFA
Total Diversion: 10.8 AFA

Date Filed: 04/14/2008

Place Of Use: AESTHETIC STORAGE
T04N R01W S15 NWNW

Remark: Water bearing zone to be appropriated is from 0 to 25 feet.

Mitigation is proposed for consumptive use by leaving 0.02 cfs of Pioneer Ditch Co. water undiverted in the Boise River.

Permits will be subject to all prior water rights. Protests may be submitted based on the criteria of Sec 42-203A, Idaho Code.

Any protest against the approval of this application must be filed with the Director, Dept. of Water Resource, Western Region, 2735 Airport Wy, Boise ID 83705 together with a protest fee of \$25.00 for each application on or before 06/08/2009. The protestant must also send a copy of the protest to the applicant.

Re: Application No(s). 63-33031

Dear Watermaster:

Attached are copies of one or more applications that may be of interest to you.

Please complete the necessary recommendation form(s) and return to this office within 21 days of the date of this letter. Regional review of unprotested applications can be completed as soon as the final protest period is past; your prompt response to this request is appreciated so that your recommendation can be considered during regional review.

If after 21 days from the date of this letter the Department has not received your written recommendation, the Department will presume you do not oppose approval of the application and you have no comments for the Department to consider.

However, possible approval of the application(s) will include conditions of approval about standard controls for uses in your water district (lockable, measureable diversion works, etc).

Please contact this office at 334-2190 if you have any questions regarding the application(s).

Sincerely,

Denise Buffington
Administrative Assistant

Dear Mr. Lester:

Attached are two signed originals of an application for permit to appropriate groundwater for aesthetic storage including a plan for mitigation of the associated consumptive use using existing ditch shares in the Pioneer Ditch Company Ltd.

Also included with this application is a check for \$250.00 from the applicant for the application fee, a narrative of the proposed work on the property and the mitigation plan, and a letter from Pioneer Ditch Company approving the use of existing irrigation shares.

Please return a confirmed copy of one of the original applications to me in the self-addressed postage paid envelope.
