Dear Mr. McGhee:

We received your letter concerning the proof of application of water to beneficial use forms.

We have taken the liberty of typing up the forms for you and have taken the information from the applications for permits. Please read these forms over and if you agree with them please sign and have your name notarized. If you do not agree with the information please make the necessary changes and sign your name and have it notarized. If you do have some questions regarding the proof forms you may visit our Northern Regional Office in Coeur d'Alene at 4055 Government Way or phone them at 667-6484.

In regards to the measuring device requirement on Permit No's. 97-7031 and 97-7032 some type of measuring meter will have to be installed before a water right license can be issued on these permits. In lieu of installing a measuring meter you may have a professional engineer certify and examine your system and have him make actual field measurements of your systems.

If you have any questions regarding these matter, please do not hesitate to contact either this office or our Regional Office in Coeur d'Alene.

Norman Young,

The pump on the McGhee project is designed to pump 1000 gallons per minute at 410 feet of head. The pump is a 150 horse power Berkely. There are two Traveling Big Guns being used. According to the Nelson big gun chart, with pressure and nozzle size reading, the pump is using 1000 g.p.m. The water is pumped through eight inch and six inch pvc pipe to the points where the big guns are connected.

A flow meter was not installed in this system as I did not know the Idaho requirements. Mr. McGhee was to check into the matter. If one is needed, please advise Mr. McGhee.
