

MEMORANDUM

TO: Application for Permit 45-14201 File

FROM: Corey Skinner

DATE: April 27, 2009

SUBJECT: Field Visit

On April 23rd, Jeff Cooper and I visited the site of the point of diversion (spring) described on Application for Permit 45-14201. Jeff and I were accompanied by Neil Adams (applicant), Calvin Adams (Neil's son), and Jed Wayment (neighbor). Jeff and I visited the site of the spring and verified the location and the source of water. Note that the diversion works were buried under recently disturbed earth. We also observed a line of recently disturbed earth that would be consistent with a buried pipeline from the point of diversion to the place of use (applicant's property). We also observed exposed vent pipes along the buried pipeline. It appeared that the diversion works and conveyance system were already in place. The following photo documents our observations...

View of spring area (disturbed earth) that serves as the source and point of diversion for Application for Permit 45-14201 with the place of use location (applicant's house) visible in the background of the view.
