

MEMORANDUM

Date: April 23, 2009

To: Permit File 63-9983

From: Jeff Peppersack 

Re: Office Visit from Barb Jekel

Barb Jekel visited the office today to inquire about licensing her water right for 5 acres of pasture in the Eagle area. Proof was submitted in 2003 to reinstate the permit. I explained the permit and license process and told her the Department has not been able to license her water right due to other priorities. I indicated that the only way we might complete an exam this year is if we used it as training for agents to complete requirements for Sr. Agent position since it is a fairly small system and close to Boise. I promised to forward her request for licensing to others for consideration. I told her I couldn't promise that we would be able to complete an exam this year, but her permit authorizes her to continue irrigating based on development that was accomplished before proof was due.

Barb also wanted to change the phone number listed in our files, so I updated the new phone number in the database (208-938-0520).
