Subject: FW: Henderson Creek Spring -- data request

To File 15-4158

Mr. Black,

Steve Baker from IDWR's Hydrology Section did not find any measurement records for Henderson Spring. There are two water right filings for diversions from a spring at that location. They're numbered 15-4158 (4.0 cfs) and 14-4167 (0.5 cfs). Both filings are statutory claims received in the 1980s. Unlike licensed or decreed rights, statutory claims are not confirmed by IDWR or by a court. Consequently, there are no measurement records in the water right files either.

Please call or email if you have additional questions about the water right filings.

Sincerely,

Shelley Keen

Subject: FW: Henderson Creek Spring -- data request

Shelley,
Regarding the data request listed below, I was unable to any flow measurements for Henderson Creek Spring with the USGS or Hydrology's data. I was thinking if a water right exists for it, maybe there's measurement data in the field exam. Would you or your staff be able to respond this person's request.
Thanks,
Steve

To Whom it May Concern,

We are currently conducting a records review with regard to Henderson Creek Spring located in Oneida County in the SW1/4 NE1/4 T. 16S R. 36E Sec. 2 (16S-36E-2cda). Does IDWR have any records of measured flow from this spring? IDWR records show a water right of 4 cfs, but we were curious if this water right is based on any actual flow measurements or if it is anecdotal.

Please call or email me at your earliest convenience.

Sincerely,

Bill D. Black, P.G.
