Re: Snake River Basin Adjudication (SRBA)
Partial Decree for Water Right No. 65-12733

Dear Diana,

Omissions were discovered recently on the partial decree referenced above. Remarks from the Director's Report were apparently omitted in the Partial Decree that was issued without objection. Pertinent pages of the Director's Report are enclosed for your convenience.

The remarks omitted are underscored in the attached recommended report. You will see an essential description of the flows for given period of use in a given reach of river are missing from the partial decree. One exception that is underscored is the remark for the place of use. You will see the Director's Report was silent on this element. Knowing the Court prefers to describe a place of use for each water right, I have suggested the place of use remark for an amended partial decree, after notice and hearing of course.

IDWR stands ready to respond to any questions the Court may have. I extend my thanks for considering this request.

Sincerely,

Donald V. Shaff, MPA
