Subject: RE: Lapsed Permit 22-13178/Teton Springs

Robert,

I had a chance to review the information you submitted and was able to conclude the following:

As of 2003, 271 lots were stubbed in from water mains AA through Q. Water mains R through Z were in place by 10/2007, however, this is after the beneficial use due date of August 1, 2006. I understand that some of the lots on water mains R through Z may have been in place prior to the beneficial use due date, but there is nothing in the information that you submitted to substantiate this.

If you have anything showing that homes were in place or lots were stubbed in prior to the proof of beneficial use due date on water main R through Z please submit it to the department. Otherwise, the department will proceed with licensing permit 22-13178 with a limit of 271 homes/lots and a new permit will need to be filed to cover the additional homes/lots. Please let me know if you have any further questions.
