Bob,

Thank you for the additional information. The documentation that you submitted is exactly what I needed to determine how many lots can be authorized under this permit.

I am now in trying to determine the capacity of the two wells by using a theoretical estimate based on the specs from the well driller's report. For well #1 I get 137 gpm and well #2 I get 211 gpm for a total of 0.78 cfs. This is short of the 0.89 you submitted on your proof of beneficial use form, so if you have any pump test data that you can submit to me that shows a higher capacity I can re-evaluate the amount to be licensed.

Lastly, I noticed there was a hearing with the PUC and this water right now may belong to Teton Springs Water and Sewer Company. If that's the case a Change in Ownership form should be submitted with a \$25 filing fee to update our records. I have attached the necessary forms for your convenience to this email.

Please don't hesitate to give me a call or drop me an email if you have any further questions. I will hold off on licensing this permit for 30 days to give you time to submit any pump test data.

Sincerely,

Cherie Padilla

Cherie,

Attached is additional supporting information relative to the Teton Springs water rights re-instatement. These four (4) PDF files include the following:

- 1) **Water Rights Memo-Cherie Padilla IDWR-02-01-09** -- Transmittal letter explaining the information being submitted, one page.
- 2) **TS Water Service Invoices_2-1-09** -- Scanned copies of the invoices from Evans Construction which include the service work. The quality of some of the pages is poor so I have also annotated the sheet number and provided a call out to the service line item, 15 pages
- 3) **Water Service Installation Records-2-1-09** -- This is a spreadsheet which summarizes the service line totals with references to the specific invoice by reference number. These reference numbers are also used on the attached map, one page.
- 4) **TS-Water services map-120108** -- This is a map which shows the location of the services based upon the

2/5/2009

record plats for Teton Springs. This is best printed at a larger format size given the detail included, one page.

Please let me know if you have an questions about this information.

Thank you.
