Subject: Warren License 67-07685

Sandy,

My appologies for not getting you this information sooner. Hopefully what follows is what you need from me...

1) A statement that the Warren's have requested this condition be waived

Bruce Warren contacted me about his diversion in Council, Idaho, and the condition of a lockable device at his diversion point. He said that his diversion works would consist of an engine-driven pump with a suction hose into a deep spot in the river. This set up does not have a lockable device persay, and he requested that the condition be removed from 67-07685.

2) That the arrangements you have made with the Warren's is acceptable

After discussing the diversion point and works with Mr. Warren, we agreed that the pump and suction line could be shut down and the pump removed in any event requiring the cessation of water being diverted there. This arrangement is acceptable to both Mr. Warren and myself.

3) You approve of waiving the requirement of them having and maintaining a lockable device at their point of diversion.

I am fine with having the requirement and maintenance of a lockable device waived, so long as it is included in the license that this diversion may be monitored and/or adjusted by the watermaster of Water District 67. I believe this to be agreeable to both the watermaster and the Warrens'.

I am sending a copy of this correspondence to the Warren's as requested by Mr. Warren. If there's anything else you need, please let me know.

Thanks,

Brandi Horton
