Describe the reason for the proposed changes

Transfer creates permissible place of use for all surface and groundwater rights on this farm, consolidating land outside pivots onto new land just south of existing irrigated land (where a new pivot will be installed). Also ties 2 existing wells together; they have actually been tied together in a shared mainline for many years. Transfer also adds Mrs. Gardiner as co-owner of the water rights. While the north well is shared with brother Matthew Gardiner, the south well is not. Some land at the north end of the farm is irrigated with both gravity and sprinklers; all other land is just sprinkled.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
