Dear Idaho Department of Water Resources:

As President of Devil Creek Ranch, Incorporated, I am submitting a Letter of Concern regarding the application for Transfer No. 75397 that was filed with you by Brackett Ranches Limited Partnership, 261 Devil Creek Road, Castleford, Idaho 83321. This application proposes to split an in-stream stock water right and move half to a new pipeline diversion to troughs, as was stated in the Times News on March 12, 2009.

My main concerns are that the water system is not authorized to transport water to private land, and no one has given Bracketts permission, from the water users or the Bureau of Land Management, to transport the water under this transfer. To my knowledge, currently the user members of this Association have not been informed of the Brackett's requests or plans concerning the changes they wish to make, since there has been no communication forthcoming.

Sincerely,

A handwritten signature in cursive script that reads "Ronda K Macaw".

Ronda K Macaw, President
Devil Creek Ranch, Incorporated
