I have contacted Ernie Carlson and he suggested I send a new change in water right ownership. In January 2001, I purchased 9.6 acres from Constance Mueting of an original 15 acre parcel that was previously owned by Karl Evans. In May of 2001 I received notice that claims 29-2269D, and 29-4045D had been split in a 60/40 rate resulting in new claims 29-13160, 29-13161, 29-13162, and 29-13163. For some reason, claim A29-12552 was not split. This claim was for a .020 cfs domestic and .020 cfs stock water year round. There is a pipeline from a spring going to the home(Muetings property) and a separate pipeline running to a stock tank in horse stalls connected to a barn(Davis property). There is a connection where a metal pipe comes under the county road into pvc tubing and then goes under ground to the stock tank. The current owner of the Mueting home(Margaret Stallwood) has threatened to destroy the pipeline because it runs under her property. The amount of water is a very minimal amount(just a small trickle) but does have great value to stock when the weather is sub zero as it often is in Bannock County. I am requesting this right be split as well to give me legal claim to continue to use this water that has been in place for over ten years to my knowledge. If you need any further information please feel free to contact me.
