

MEMORANDUM

Date: December 9, 2008
To: Transfer 75281File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes to change the point of diversion of a ground water right, 37-21666, allowing for the diversion of 0.1 cfs and the irrigation of 5.0 acres. The current diversion is located approximately 6.9 miles North and 2.0 miles East of the Highway 75 and Highway 20 Junction. The proposed new diversion is an existing well located just southeast of Bellevue in the Bellevue Farms Subdivision, approximately 6.5 miles North and 2.0 miles East of the Highway 75 and Highway 20 Junction. The existing well was drilled as a domestic well prior to July 1, 1987 per owner. No record of a drilling permit or well log was found during research. For this reason the applicant was not required to pay the well drilling permit fee upgrade from domestic to irrigation. Note that the right involved with the transfer is a supplemental groundwater right and is combined with Big Wood River rights 37-21674, 37-21683, 37-21692, 37-21701, and 37-21710 to irrigate the same 5.0 acres.

- **Authority to File:**
The applicant is listed as the current owner of the right being transferred according to IDWR records.
- **Water Right Validity:**
Water Right 37-21666 is currently recommended in the SRBA.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated. Note that the right involved with the transfer is a supplemental groundwater right and is combined with Big Wood River rights 37-21674, 37-21683, 37-21692, 37-21701, and 37-21710 to irrigate the same 5.0 acres.
- **Local Public Interest:**
No apparent hydrological impact. Recommend no advertisement and Regional approval.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water and sprinklers are to be used for irrigation.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application
