Re: Application for Transfer No. 73788, Water Right No. 61-7283A

Dear Mr. Eisenman:

The above referenced transfer application can be approved once the Idaho Department of Water Resources (IDWR) receives additional information noted below.

The application proposes five years to develop up to sixteen wells, even though the proposed use will be limited to fifty acres of irrigation per year. This assumes multiple relocations of the limited irrigation within the proposed 1,280 acre permissible place of use. How will it be feasible to accomplish this within the requested time period?

We discussed this in a January 20, 2009 telephone conversation. I understood you were going to visit this office shortly after that call to provide this information.

Please submit the requested information for application processing to continue. You may seek additional time to provide the information by making a written request to delay processing. Your written response including the requested information, or a request for more time to seek the information, must be received within the next thirty (30) days.

Without a timely reply, IDWR will issue a preliminary order to reject the application. The application fee will not be refunded for a rejected application. A rejected application may be re-filed when adequate information can be provided.

Please contact me at 208-334-2190 if you have any questions about this letter. Thank you for your prompt attention to this last unresolved item in your application.

Sincerely,

Steve Lester
Water Rights Supervisor
