DEPARTMENT OF WATER RESOURCESAPPLICATION FOR TRANSFER OF WATER RIGHT
PART 1Name of Applicant CASSIA CREEK FARMS, LLC Phone (925) 837-1450Post Office address PO BOX 580 DANVILLE, CA 94526

A. PURPOSE OF TRANSFER

1. ☒ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☒ Change nature of use ☒ Change period of use ☐ Other _____
2. Describe the reason for the proposed changes This application proposes changing the nature of use of a portion of water right 43-2473 from irrigation to commercial and stock water associated with a proposed dairy. The point of diversion, place of use, and period of use of the transferred portion are correspondingly changed. Also, this transfer redescribes the location of a 40-acre portion of water right 43-2569 for irrigation on the proposed dairy site. An additional transfer changes the places of use and points of diversion for irrigation water rights 43-2472, 43-2475, and the remaining portion of 43-2569, moving them from the dairy site to other locations within the farm.

PART 1

6. General Information:

- a. Description of diversion system Up to four proposed wells with electric pumps will divert ground water for stockwater and commercial use in a dairy and up to 40 acres of irrigation on the dairy site
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
 _____ Yes ☒ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
124 acres of the place of use under water right 43-2473 will no longer be irrigated after the transfer
- d. Remarks:

Water right 43-2473 authorizes a total of 400 acres and is partly overlapped by water right 43-2519 by 80 acres. A 124-acre part of the non-overlapped portion of right 43-2473 is proposed for transfer to stock and commercial uses associated with a dairy. The applicant agrees to limit total diversion volume to the consumptive portion of the transferred right. The proposed consumptive portion is based on the irrigation requirement of 970 mm (3.18 ft) per year based on an average growing season precipitation deficit from three climate stations in the vicinity of the farm for alfalfa hay, a typical crop grown on the associated land (see Table 1, below)¹. The consumptive use for 124 acres of alfalfa hay totals 394 acre-feet. This amount is sufficient to meet the anticipated required quantity of 373.3 acre-feet per the attached Dairy Water Use Worksheet plus an additional 5% margin-of-safety volume. This quantity will supply 6,000 milking, 1,000 dry, and 5,000 replacement cows and associated dairy water requirements. Dairy wastewater will be land applied and/or discharged into a lagoon.

Forty (40) acres of the non-overlapped portion of 43-2569 will be used within a 233-acre permissible place of use at the dairy site for landscape and grass cover. Other irrigation water rights currently listing a place of use within the dairy site will be moved; a companion transfer changes the places of use and points of diversion for irrigation water rights 43-2472, 43-2475, and the remaining portion of 43-2569, moving them from the dairy site to other locations within the farm.
