Waldvogal Acres Subdivision

Water rights are being requested for three reasons

1. Fire Hydrant for Melba and Kuna Fire Districts use. This subdivision is at the far end of each district. If there is a fire in the area it is about a 30 minute round trip to fill their water trucks. I stated to them I would put in a hydrant. The optimal would be approximately 600 GPM. This would mean it would take 5 minutes to fill the 3000 gallon tanks. There has not been a need for the last 2 years in that area so to predict the amount of water is not feasible.

2. Domestic use. I intent to put in 4 wells with single 7 ½ horsepower pumps. Each well will service two homes. Double back flow gauges will be provided for each home. The wells will be owned by the Homeowners association. Therefore, if there is a problem with a well it will be the Homeowners Assoc that will be responsible.

3. This development is a private Equestrian community. To provide for the horses a pasture is important. Therefore I am requesting a 10 acre pasture to accommodate approximately 16 to 20 horses. This will not be a commercial venture. As part of the Sewer system that I am installing there will be an opportunity to reuse the grey water that is the by-product of this system. There will be an underground drip system that will be installed to aid in the irrigation.

APPLICATION REMARKS – WALDVOGEL ACRES SUBD.

4 similar applications are filed.

Each application includes 1 well for 2 homes and yard irrigation.

Subdivision lots for homes are $\frac{3}{4}$ acre each, maximum yard irrigation will be $\frac{1}{2}$ acre per home (1 acre per well) – probably less but filed on maximum just in case.

Any single well or any combination of the 4 wells will irrigate a shared 10 acre pasture.

Therefore each application lists domestic water for 2 homes plus irrigation water for 11 acres. However, the 4 applications combined will include a 10 acre limit for pasture irrigation.

In-house use for 2 homes is 0.06 cfs per IDWR standards.

Irrigation use is 0.02 cfs per acre per IDWR standards but limited to 0.20 cfs.

Domestic and irrigation water is not additive within each application.

The water bearing zone to be appropriated for each well is from 400' to 475' feet.

Section $\frac{1}{4}$ $\frac{1}{4}$ descriptions per subdivision plat are as follows:

<u>APPL #</u>	<u>SUBD LOTS</u>	<u>WELL IN</u>	<u>HOMES/YARDS IN</u>
1	2 & 3	NWNE	NWNE
2	4 & 5	NWNE	NWNE
3	7 & 8	NWNE	NWNE (most) NENW (some)
4	9 & 10	NENW	NENW

Separate fire protection is not included since it is exempted under IC § 42-201.
