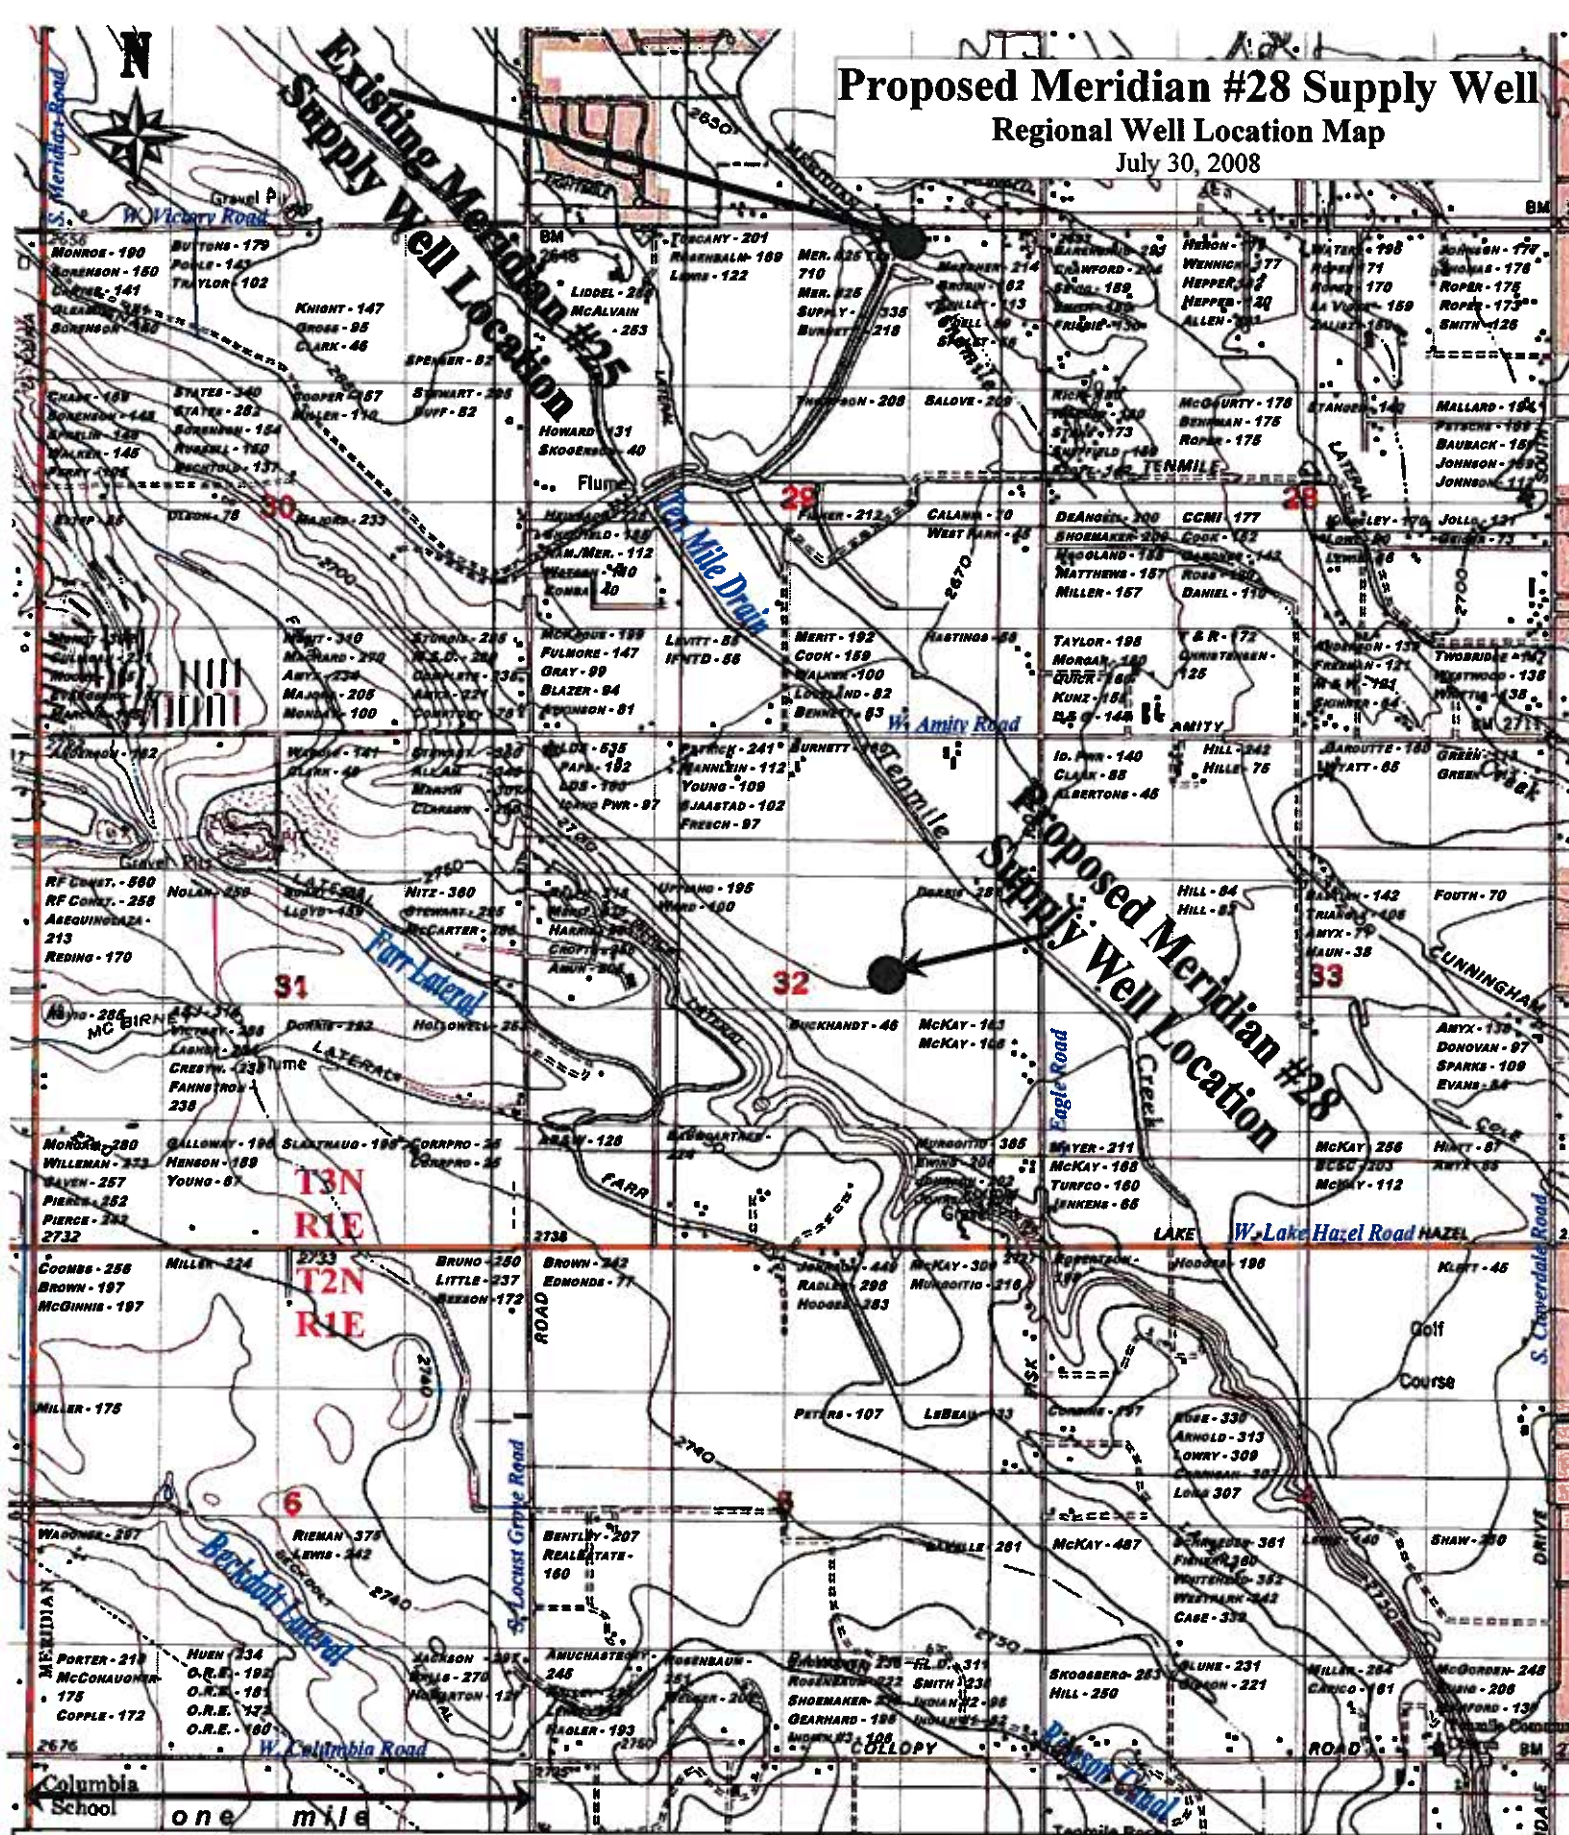

Figure 1. Location map of wells in T.3N. R.1E., Sections 28-33 and T.2N. R.1E., Sections 4-6. Wells from the IDWR Drillers Report Files (thru 7-30-08), are plotted to the nearest $\frac{1}{4}$, $\frac{1}{4}$ section by name followed by total depth of the well. Due to space consideration, the five deepest wells are plotted in each $\frac{1}{4}$, $\frac{1}{4}$ section. If less than five wells exist in a 40-acre tract, then the wells plotted are the only wells listed. Wells in italics and a question mark (? sample - xx) indicate complete well locations were not defined on well log. Monitoring wells are shown in red, which may "replace" one or more of the five deepest wells in that $\frac{1}{4}$, $\frac{1}{4}$ section. Some well logs may be missing and others may be mislocated on the driller's records. Base map is a (1:24,000 scale) USGS 7½ - minute map.
