Attachments: 63-31430 well site.jpg

Michelle, Attached is a 2004 aerial photo with the well site I digitized after a site visit on September 7, 2007. Unfortunately, I don't have a GPS point for this well.

Let me know what else you need. The City is working with Brown to produce a letter explaining the late submittal of Proof.

Roxanne,
I need confirmation on the location of the well for lapsed permit 63-31430. The attachment is a screen shot of the subdivision from our 2004 NAIP imagery. I believe that the well is located within the lot outlined in aqua and that the building I see in that lot is the pump house.
However, the current POD in the database is the grey dot located in a lot across the street, and southeast. And DEQ spatial data has a public supply well drilled by Hunemiller located in one of the empty triangular lots in the NE corner.

Thanks
Michele
