RE: Water Permit #92-07208
Water Permit #92-07209

Dear Mr. Haynes,

At this time we would like to request a waiver for condition #4 listed on the above two mentioned Permits to Appropriate Water as stated below:

- "Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion."

We currently use portable, small (defined) capacity water pumps and metering the point of discharge is not practical for us.

If you have any questions, please do not hesitate to contact me at (208)245-2096.

Sincerely,

David K. Thom
General Manager
