Attachments: Agreement in principle for Settlement of Protest of 47.doc

Please find attached a modified agreement. I forgot to add condition #6 in the first.

Agreement in
principle for Set...

Sorry about the confusion.

Subject: Draft settlement agreement for protested 47-17127 application

Nick and Leo,

As promised please find attached a draft settlement agreement based on the pre-hearing conference we held last Wednesday. I have reviewed these draft conditions with state office staff and they find them acceptable. Please look it over and if you find it acceptable please sign it and return it with original signatures.

During my discussion with state office staff I learned that IDWR is not aware of a production well being used as the site of injection for the same water as was discussed at our conference. I did learn that numerous closed loop heat exchangers have been successfully installed in geothermal areas and are quite efficient. These systems utilize a heat exchanger with fluid that is circulated other than water and the loop is placed in a separate well and sometimes grouted in place. I would suggest that Nick explore this proven option further for the heating needs of the home.

If you have further questions or suggestions please let me know. If you e-mail me please include the other party in the e-mail string.

Respectfully,

Allen Merritt
