Re: Idaho Water Company – Brown/Preston Transfer

To whom it may concern:

Please find attached an application for transfer filed for the ultimate benefit of Shekinah Industries – however, as described in the attached contracts, the transfer should be held in the name of Idaho Water Co. until final transfer approval

The transfer seeks to split several water rights and change the place of use for 272 acres of combined ground water rights from the Jay Brown farm, and 369 acres of combined ground water rights from the Bernard Brown farm to be utilized at land owned by Shekinah Industries located several miles northwest of the water rights current authorized location. Final layout of the new diversion system is under development.

Total fees for the proposed transfers are expected to be \$570.00 and a check for that amount is included to cover the IDWR transfer processing fee. If you need any further information, please feel free to call.

Sincerely,

Jason C. Helms, P.E.
