Dear Mr. Haynes,

I would like to address the questions that were asked of me regarding Application to permit No. 98-7877 and 98-7878

Number 1: No the proposed use will not reduce the quantity of water under any existing water rights.

Number 2: The proposed water supply is sufficient for the purpose intended.

Number 3: The applications are made in good faith and are certainly not speculative purposes as one application has been in use and supplying water to our residence, gardens, and livestock since 1992. And the other one is on land we recently purchased and we have already begun the clearing of a building site and have made arrangements for the building of a home to which we plan to pipe the water to. We plan to do this in the coming summer.

Number 4: Yes the applicant has sufficient financial resources with which to complete the project. The project for which one application is in regards to has already been accomplished in or about 1992 and the newly acquired one has been contracted to be done in the following year.

Number 5: No, the proposed use will not conflict with the local public interest in the public water resource. In neither application does the water leave our property to go any where else as they are springs not water tables.

Number 6: No, the proposed use will not be contrary to the conservation of water resources within the State of Idaho.

Number 7: No, there will be no adverse affect; we are only diverting water from springs on our property to other areas of our property. I will reiterate the water involved never leaves our property.

There is no legitimate reason for the contesting of our applications as it affects no one else. It is definitely no where near the contestant's property and affects him not at all.

Please set up a conference to resolve this matter at your earliest convenience.

Thank you.
