

MEMORANDUM

TO: Application for Permit 37-22385 File and Transfer Application # 73969 File

FROM: Corey Skinner

DATE: January 26, 2009

SUBJECT: Conversation with Craig Hobdey

This day Allen Merritt and I telephoned Craig Hobdey in response to his January 14, 2009 letter relating to issues he outlined relating to Application for Permit 37-22385 and companion Transfer Application # 73969 (see copy of letter in files). Allen and I explained the applications and what they were proposing to the best of our knowledge and understanding. Mr. Hobdey asked if the pond use could be described as "irrigation storage" rather than "recreation" on the water right(s) and if the season of use could be limited to the irrigation season rather than year round use. Allen and I indicated that it was our understanding that the pond will have water in it year round, but that we could discuss the matter with State Office staff for further clarification.
