KLETH, According to the figures you gave me, I calculated a total stockwater usage of 401,500 gallons a year. I'm sorry but I can't convert that into af or cfs.

The surface area of the new pond by the front gate in section 30 is 196,020 sq. ft.
The surface area of the new pond in section 32 is 69,696 sq. ft.
The surface area of the existing pond that is furthest north in section 30 is 36,000 sq. ft.
The surface area of the existing pond next to house is 24,000 sq. ft.

The volume of the new pond by the front gate in section 30 is ~~25~~ 45 af.
The volume of the new pond in section 32 is 10 af.
The existing northernmost pond has a volume of 8 af.
The pond next to the house has a volume of 3 af.

I have maps prepared from the USGS Daugh and Bovill maps. If you need me to, I'll fax them also but I don't think they'll come out very good.
