KIETH - SORRY, BUT THE USGS MAPS CUT RIGHT THROUGH THE MIDDLE OF THE PROPERTY. SO I HAD TO MAKE TWO MAP COPIES. MAP 1 IS THE DEER USGS MAP. I ZOOMED IN A BIT TO MAKE THE PROPERTY CLEARER. THE DRAINAGE GOES RIGHT INTO BRUSH CREEK. THERE IS ONLY WATER IN IT DURING RUNOFFS. I HAVE PENCILED IN THE APPROXIMATE POND LOCATION. MAP 2 IS THE BOVILL USGS MAP. THIS POND WILL DRAIN INTO THE UNNAMED STREAM THAT GOES INTO THE POTLATCH. RAY HENNEKY CAME OUT AND SPENT A COUPLE OF HOURS LOOKING OVER THE PROPOSED SITES AND SAID IT LOOKS GOOD, JUST SEND HIM A DRAFT APPLICATION AND HE'LL ATTACH HIS COMMENTS.

CALL ME AT 254-717-2163

(IF I'M OUT OF RANGE, PLEASE LEAVE
A MESSAGE AND I'LL CALL BACK)

40N 2W 30

KIETH, According to the figures you gave me, I calculated a total stockwater usage of 401,500 gallons a year. I'm sorry but I can't convert that into af or cfs.

- ✓ The surface area of the new pond by the front gate in section 30 is 196,020 sq. ft.
- ✗ The surface area of the new pond in section 32 is 69,696 sq. ft.
- ✗ The surface area of the existing pond that is furthest north in section 30 is 36,000 sq. ft.
- ✗ The surface area of the existing pond next to house is 24,000 sq. ft.

- ✓ The volume of the new pond by the front gate in section 30 is 45 af.
- ✗ The volume of the new pond in section 32 is 10 af.
- ✗ The existing northernmost pond has a volume of 8 af.
- ✗ The pond next to the house has a volume of 3 af.

I have maps prepared from the USGS Derry and Bouill maps. If you need me to, I'll fax them also but I don't think they'll come out very good.
