ATTN: SHARLA COX

TO WHOM IT MAY CONCERN:

Please find enclosed the information that was requested by you to complete our application for water rights for irrigation out of the Salmon River.

- 1) Our water source is the Salmon River and the amount of diversion is very small. Rate of diversion will be approximately 0.04cfs; this should impose very little to no effect on quantity of existing water rights.
- 2) The Salmon River at point of diversion is approximately 100 feet wide and 2 1/2 feet deep at low point. Purpose for diversion is yard irrigation. Irrigation techniques will be rain bird sprinklers which require very little water. Total amount to be appropriated will be 0.04cfs approximately.
- 3) Water usage is solely for our property which we own free and clear. Point of diversion and use of water for our property only we do not intersect or cross other land owners. Our community relies on wells for its domestic water supply and we are wanting to elevate a drain on the community water system.
- 4) Please see attached letter of financial resources submitted by Boulder Dam Credit Union located in Boulder City, NV.

The approximate construction cost as follows:

ELECTRIC LINE	\$1,000
ELECTIC SUCTION PUMP	750
LABOR/INSTALLATION	500
PIPING	250
MISC	200

TOTAL \$2,700

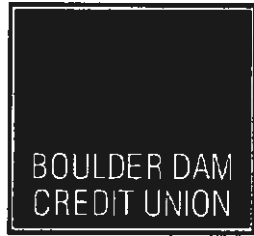

This information was furnished per your request, if any additional information is needed please contact us and we will do our best to complete and furnish any information available.

Sincerely,

Gail F. Gibson

Sandra K. Dolliver
