Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. Fuller:

The Idaho Department of Water Resources is returning your recently submitted application for additional information and corrections.

The following corrections need to be made to the application.

Item #4 Water use and Purpose

You are applying to irrigate 5 acres of land. The maximum diversion allotted for the irrigation of 5 acres or less is 0.03 cfs per acre or 0.15 cfs. The corresponding irrigation season for your area is between February 15 and November 11.

Also, you indicate the desire to provide stockwater for approximately 17 head of mixed stock in Item #8(b) of the application, but didn't include stockwater in Item#4. For 17 head of mixed stock you can request a diversion of 0.02 cfs, with a corresponding period of use as year round or from January 1 to December 31. Please make these changes to the application.

Item #5 Totals

Your total diversion request would now become 0.15 cfs + 0.02 cfs or 0.17 cfs instead of 1.0 cfs as indicated on the application.

Item #9 Place of Use

The correct quarter quarters for the place of use are the NE¼ of the NW¼ instead of the SW¼ of the NW¼ as indicated on the application. Please refer to the attached aerial photograph and make the correction on the application as indicated.

Well Upgrade

The well you propose to use for this project was constructed as a single family domestic, please see the attached well log, which means the driller purchased a \$75.00 permit. If a well is to be used for any other purpose than domestic, the fee for the well would be

State of Idaho

DEPARTMENT OF WATER RESOURCES

Northern Region, 7600 N. Mineral Drive, Suite 100 • Coeur d'Alene, Idaho 83815

Phone: (208) 762-2800 • Fax: (208) 762-2819 • Web Site: www.idwr.idaho.gov

C. L. "BUTCH" OTTER
Governor

DAVID R. TUTHILL, JR.
Director

\$200.00. The well fee needs to be upgraded by \$125.00. Since you have already submitted an application fee of \$250.00 and since the application fee for the irrigation of 5 acres and stockwater will only come to \$100.00, the well upgrade fee can come out of what you have already paid and the Department now owes you \$25.00 in refund.

Other Water Rights

You currently have a pending decreed water right (85-7439) for the irrigation of 4 acres, stockwater and domestic use in the same quarter quarters as your application. I am assuming this is on lot 2593 and not overlapping onto lot 2595, which you are requesting water for. Please verify the location of water right 85-7439.

Lastly, your project happens to be located within the Salmon-Clearwater River drainage, which is now considered a sensitive basin. Idaho Code 42-203A (5) requires IDWR to evaluate the attached criteria for applications to appropriate water. Please review the attachment, seek comments from the Department of Fish & Game, the Department of Environmental Quality and respond to Rules 40.05 c. through 40.05 g. on page two and submit the information to IDWR. The contacts for these agencies have been hi-listed on the attachment for your convenience.

Please return the corrected application and agency comments within the next 30 days, so as not to delay the processing of your application. If you have any questions, feel free to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent

Re: Application for Water Appropriations Permit

Dear Mr. and Ms. Fuller,
DEQ has received a request for comment on your application to the Idaho Department of Water Resources requesting approval to appropriate ground water from an existing well. Based on the information that has been provided, DEQ cannot estimate nor predict impairments to surface or ground water beneficial uses resulting from the requested withdrawal. However, assuming all federal, state, and local permits have been obtained, drinking water regulations met, and reviews completed, we can offer the following comments.

DEQ has no objections to the proposed withdrawals providing the existing and projected beneficial uses of ground water and interconnected surface water be maintained and protected, and degradation that would impair ground water and interconnected surface water not be allowed.

Thank you for requesting our review and comment of your activity.

Sincerely,

A handwritten signature in black ink that reads "Kerby M. Cole".

Dear Mr. and Mrs. Fuller:

RE: Application for Approval of Water Appropriations for Groundwater

Idaho Fish and Game has reviewed your draft application and pertinent attachments for a water right to withdraw groundwater 0.17 cfs of groundwater from a well near Lewiston for irrigation and stockwater.

IDFG believes that, based on the proposed location and amount of withdrawals, and on the basis that the well already exists and has been operating for some time without known adverse impacts, the proposed development is unlikely to have a significant impact on fish, wildlife or habitat. We have no objection to the proposed withdrawal.

Thank you for the opportunity to comment. Please contact Ray Hennekey at this office if you have any further questions.

Sincerely,

Dave Cadwallader
Clearwater Regional Supervisor

MEMORANDUM

To: Water Right Application # 85-15708

From: Keith E. Franklin

Date: October 27, 2008

Re: Application for a Permit to Appropriate Water within the Salmon and Clearwater River Basins.

Re: Regional Analysis and Recommendation in accordance with Water Appropriation Rules (IDAPA 37.03.08.040.05).

Water Supply Information.

The Idaho Department of Fish & Game as well as the Department of Environmental Quality have no objection towards the applicant utilizing 0.17 cfs from groundwater for the purpose of stock water and the irrigation of 5 acres.

Good Faith, Delay, or Speculative Information.

The applicant plans to divert water for his own use on property that he owns and there are no known issues with any other party.

Financial Resources Information.

The applicant appears to have adequate means by which to see the project through.

Local Public Interest.

The Idaho Department of Fish & Game and the Department of Environmental Quality have been ask to comment by the applicant. Written comments received from these agencies, indicate they are not opposed to the applicant's proposal and see no adverse impact to fish, wildlife or habitat.

Injury to Other Water Rights.

There isn't any foreseen potential to impact area water right holders.

Recommendation.

Northern Region recommends proceeding with the processing of this water right application.

IDAHO DEPARTMENT OF WATER RESOURCES

Applying for a Permit to Appropriate Water in the Salmon and Clearwater River Basins

Idaho Code § 42-203A(5) requires IDWR to evaluate the following criteria for applications to appropriate water:

- The potential to reduce the quantity of water under existing water rights
- The sufficiency of the water supply for the proposed appropriation
- The good faith nature of the application
- The adequacy of the applicant's financial resources
- The local public interest in the public water resource
- The conservation of water resources in Idaho
- Impacts to the economy of the local area or watershed

To ensure that IDWR has sufficient information to evaluate the criteria, Rule 40.05 of the Water Appropriation Rules (IDAPA 37.03.08.040.05) requires water right applicants to submit additional information to IDWR in connection with their applications.

The additional information requirement is usually waived for applications proposing the appropriation of 5.0 cfs or less or the storage of 500 af or less. Because the waters of the Salmon River and Clearwater River drainages are habitat for fish species listed as endangered or threatened under the federal Endangered Species Act, caution is necessary to ensure that new appropriations of water do not undermine efforts to protect and restore the ESA listed fish species and other public values in the basins' rivers and streams. IDWR is, therefore, requiring that applicants submit the additional information required by Water Appropriation Rules 40.05.c through 40.05.g, even when the applications are for less than the usual 5.0 cfs/500 af threshold. Only certain applications for small domestic and stockwater uses and applications to divert ground water for domestic use in multiple homes are exempt from the additional information requirement. A copy of Water Appropriation Rules 40.05.c-g is printed on the back of this page.

Please submit the information required by Water Appropriation Rules 40.05.c-g to IDWR within 30 days from the date you are notified that it is required. IDWR will hold your application until you have submitted the additional information. If you believe that a particular piece of information is not relevant to your application, please explain why. A complete response to Rule 40.05.f, Information Relative to Financial Resources, is not required if construction of your project will cost less than \$5,000. Instead, simply state the projected cost of your project. If you do not respond within 30 days, IDWR may void your application. If you need additional time to submit the required information, please submit a written request. IDWR can grant additional time "upon a showing of good cause."

The following are agency representatives who will help you respond to the local public interest requirement of Rule 40.05.g. Please contact these agency representatives at least 15 days prior to the end of your 30-day response period.

Idaho Department of Fish and Game contact list for water right applications:

Panhandle Region: Mary Terra-Berns at 208-769-1414
McCall Subregion: Dale Allen at 208-634-8137

IDWR/North

Water Appropriation Rules 40.05.c through 40.05.g

c. The following information shall be submitted for applications to appropriate unappropriated water. . . .

Information relative to the effect on existing water rights, Section 42-203A(5)(a), Idaho Code, shall be submitted as follows:

i. For applications appropriating springs or surface streams with five (5) or fewer existing users, either the identification number, or the name and address of the user, and the location of the point of diversion and nature of use for each existing water right shall be submitted.

ii. For applications appropriating groundwater, a plat shall be submitted locating the proposed well relative to all existing wells and springs and permitted wells within a one-half mile radius of the proposed well.

There are approximately 16 wells within a one-half mile radius.
iii. Information shall be submitted concerning any design, construction, or operation techniques which will be employed to eliminate or reduce the impact on other water rights. *None used.*

We used a 10 hp. submersible pump. We do not foresee any trouble with other water rights.
d. Information relative to sufficiency of water supply, Section 42-203A(5)(b), Idaho Code, shall be submitted as follows:

i. Information shall be submitted on the water requirements of the proposed project, including, but not limited to, the required diversion rate during the peak use period and the average use period, the volume to be diverted per year, the period of year that water is required, and the volume of water that will be consummatively used per year. *Feb. 15 through Nov. 15 for irrigation and all year for the stock water at 17 cfs*

ii. Information shall be submitted on the quantity of water available from the source applied for, including, but not limited to, information concerning flow rates for surface water sources available during periods of peak and average project water demand, information concerning the properties of the aquifers that water is to be taken from for groundwater sources, and information on other sources of supply that may be used to supplement the applied for water source.

The flow rate for the well is 150 gallons per minute. There is no other source of supply.
e. Information relative to good faith, delay, or speculative purposes of the applicant, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows:

i. The applicant shall submit copies of deeds, leases, easements or applications for rights-of-way from federal or state agencies documenting a possessory interest in the lands necessary for all project facilities and the place of use or if such interest can be obtained by eminent domain proceedings the applicant must show that appropriate actions are being taken to obtain the interest. Applicants for hydropower uses shall also submit information required to demonstrate compliance with Sections 42-205 and 42-206, Idaho Code. *We own this property. There are no right-of-ways.*

ii. The applicant shall submit copies of applications for other needed permits, licenses and approvals, and must keep the department apprised of the status of the applications and any other permits, licenses or approvals or denials. *None.*

f. Information relative to financial resources, Section 42-203A(5)(d), Idaho Code, shall be submitted as follows:

i. The applicant shall submit a current financial statement certified to show the accuracy of the information contained therein, or a financial commitment letter along with the financial statement of the lender or other evidence to show that it is reasonably probable that financing will be available to appropriate the water and apply it to the beneficial use proposed.

The cost of our well was less than \$5000. It was funded out of normal operating funds.
ii. The applicant shall submit plans and specifications along with estimated construction costs for the project works. The plans shall be detailed enough to show the location of project impacts and implications.

N/A.

g. Information Relative to Conflict with the Local Public Interest, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows:

The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the city and/or county and tribal reservation within which the point of diversion and place of use are located, the Idaho Department of Fish and Game, the Idaho Department of Environmental Quality, and any irrigation district or canal company within which the proposed project is located and from other entities as determined by the director.

Already submitted by agencies.

RE: Application for Permit No 85-15708

Dear Applicant(s):

The Department of Water Resources acknowledges receipt of your water right application. Please refer to the above referenced number in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the Lewiston Morning Tribune on November 6 and 13, 2008. Submittal of protests to this application will be allowed for a period ending ten days after the second publication.

If the application is protested you will be sent a copy of the protest(s). All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in Boise for final processing. The State Office will notify you of any action taken on the application and will send you a copy of the permit if approved. A typical processing time for an unprotested application is about eight to twelve weeks.

Please feel free to contact this office if you have any questions.

Sincerely,

Keith E. Franklin
Senior Water Resource Agent

To: Marston, Sascha
Subject: Refund of \$150 - overpayment of WR Application

Good afternoon, Sascha,

We are requesting refund of \$150.00 to Tim Fuller for overpayment of WR Permit App Fee. Application as originally submitted requested 0.21 CFS. Allowable amounts for uses requested resulted in reduction of CFS from 0.21 to 0.17, thereby reducing fee required to \$150.00. Reference Receipt Number W036739 in the amount of \$250.00.

Please send Check/Warrant in amount of \$150.00 to TIM FULLER AT 30207 ROSENKRANTZ RD IN LEWISTON, ID 83501 refunding the \$150.00 overpayment. WR Application number is 85-15708, [ID No. 75073].

If you have any questions, please contact Keith Franklin or me.

Thanks very much,

Dianne Ball

Good day to you, Helen,

Attached is our letter requesting comments from the Planning division. IDFG and DEQ are not opposed to applicant's proposal and see no adverse impact to fish, wildlife or habitat.

Please send your comments no later than November 24, 2008.

Thanks.

Dianne Ball

Re: Water Permit Application No. 85-15708

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right application. A copy of the application follows for your reference.

This office can publish notice of the application as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. This will be scheduled for publication on November 6 & 13, 2008 in the Lewiston Morning Tribune

We are sending this to you for your comments, and would appreciate receiving your comments by no later than **November 24, 2008**. That is the final date for protests to be received in our office.

If we do not hear from you by that date, we will assume that no comment from you means you have no objection to, concerns about, or conditions pertaining to the issuance of this permit.

You may send comments by regular mail to the address above, by FAX to 762-2819, or by e-mail to Keith.Franklin@idwr.idaho.gov Eric.Davis@idwr.idaho.gov .

We request that you send a copy of your comments regarding, and/or notice that you intend to protest this application to the applicant as well as to our office.

Please contact this office if you have any questions regarding the application.

Sincerely,

Dianne
