Michele

Gladly. The attached shapefiles include the Irrigation PPU, the Stockwater POU, and the wells for after the transfer conditions. I created them in UTM 83, zone 11 coordinates to be consistent with the NAIP photos, but I reprojected them to IDTM for your use. Let me know that the reprojection worked out okay. Do you need other shapefiles?

Also, please note that PPU boundary is not exact, but certainly can be used for understanding the project. The boundary is inflated a little bit so that the old commercial boundary shown in Attachment #7b is visible. In trying to comply with the new transfer form, the map had so much information that it got busy, so I had to adjust some of the boundaries just so that everything can be seen.

Let me know if I can help on anything.

Subject: De Groot transfer shape request

Steve Hannula,
I received your amended transfer application for the DeGroots (x-fer# 73783) last Thursday 1/8/09 and I would like to work up that file this week. Would you be willing to share your ArcMap shape and projection files with me? It would save me from recreating them.

Thanks
