RE: Water Right Permit 63-11816

Dear Right Holder:

The above referenced Permit to Appropriate Water was issued with specific conditions regarding supplemental use and recharge on 03-04-1996. Proof of Beneficial Use was filed on 02-20-1997 & a field examination of the system was conducted on 06-12-2000 noting that approval conditions of the permit have not been met.

One of these conditions requiring annual reporting was modified by Order on 02-10-2006 specifying that the right holder should measure & record the volume of water diverted in connection with this right, and submit documentation upon request to confirm compliance with the recharge requirement & other provisions of the right.

Other conditions of the permit require the volume of water pumped from the well to be recharged into the groundwater from the surface water right, and to conduct a study to compute the effectiveness of the recharge project. This study has not been submitted to the Department.

The permit was approved because of the mitigation plan. The Department must have evidence that the proposed recharge plan is effective & conditions of the permit have been met prior to issuing a license or other final disposition of this right. Please provide a report of the required study or otherwise demonstrate how you have complied with the permit condition.

If you require additional information regarding this matter, please call me directly at (208) 287-4951, e-mail me at pam.skaggs@idwr.idaho.gov or contact me by mail, and I will be happy to assist you.

Sincerely,

Pamela S. Skaggs
Water Rights Supervisor
