RE: Water Right Permit No. 63-11816

Dear Ms. Skaggs,

The Department of Parks & Recreation is in receipt of your letter dated September 29, 2008, regarding the conditions of the above-referenced permit. Conditions include requirements for an on-site recharge program and for a report that evaluates the effectiveness of the recharge effort.

Volumetric data of ground and surface water diversions authorized under this permit, as well as static and drawdown levels, have been reported annually to the Southeast Boise Groundwater Management Area Advisory Committee. The reporting condition was removed from the permit in 2006, and the Department has continued to record monthly measurements internally.

The Department anticipates delivery of a report to IDWR by January 1, 2009. This report will present our data, as well as information from the SBGMA Advisory Committee, and evaluate the Department's recharge efforts.

Please do not hesitate to contact this office if this proposal is not to IDWR's satisfaction, or if you have any questions or concerns.

Sincerely,

Maria Minicucci
Property Administrator
