ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-10012, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 19 84.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Return flow if discharged to a subsurface system must be authorized by a separate injection well permit, and return flow if discharged to a surface water system shall meet Idaho Water Quality Standards.

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

NOTICE OF
AMENDED APPLICATION
FOR PERMIT

Notice is hereby given that permit No. 63-10012 in the name of Carnation Company was filed on March 7, 1983 for the diversion of 3.0 cfs from a groundwater source with a point of diversion within the NESW Sec 8 T 3N R 2W to be used for Domestic and Industrial purposes from January 1 to December 31 within portions of NESW Sec 8 T 03N R 2W.

The permit holder now proposes to amend the permit by changing the point of diversion to the NWNW (2 points) and the NESW Sec 8 T 3N R 2W and the place of use to the NWNW and NESW Sec 8 T 3N R 2W.

Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Statehouse, 450 W. State St., Boise, Idaho 83720 on or before March 26, 1984.

2. **Measurements:** All of the water entering the plant flowed through the Turbo Mag meter. This type of meter is fairly reliable and although it was not properly installed, I felt it would be fairly accurate. Well # 4 was not run through this meter, so I performed a theoretical calculation and added to the amount measured through the flow meter. This should give a fairly good representation of the amount of water used for the plant. Please note: The irrigation water was not run through this meter, but that portion of the plant's water use has already been licensed under 63-7218.

63-10012

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from four wells. Well number one is used as a backup well and is generally used when the irrigation system is operating and/or the plant is operating at peak production. Well number two is mainly used as a fire protection well and as a backup for the other two wells. This well was removed from the system last year to dedicate it solely to fire protection. However, new fire protection requirements is mandating that they connect this well back into the system so they can use all four wells for fire protection. Therefore, a theoretical calculation was performed on this well and added to the diversion rate recorded by the meter, since the water diverted from this well was not run through the meter. Well number 3 is the main well used for the production plant. This well generally operates full time unless it is down for maintenance or general plant cleanup. Well number four is used to supply water to the waste treatment station. This water is used for cleanup and office use. It is not connected to the other three wells, but it is apart of the system at the end of the line. The diversion rate for this well was not included in the flow rate of the meter and was added onto the rate flow calculated by the meter. The wastewater well supplies basic washup needs and bathroom uses for the waste treatment facility and rarely uses more than 13,000 gallons per day. Therefore, this will be added to annual volume to determine the total volume allowed for the facility.

Please refer to the attachment marked Section 1. Process Description for a description of how the water is used inside the plant.

OVERLAP:

There are three water rights that are used for the plant. The original water right is water right 63-7218. 63-07218 allowed for fire protection for 3.4 cfs for year round use, irrigation use for 5 acres at a diversion rate of 0.20 cfs from 5/31 to 8/15, and industrial use at a diversion rate of 2.00 cfs from 12/1 to 3/31. Water right 63-10066 was filed to extend the industrial use for the plant to year round use. 63-10066 is for 2.00 cfs from 4/1 to 11/30, thus expanding the plants diversion to 2.00 cfs for year round use. Water right 63-10012 was filed to expand the industrial use from the first two right from 2.00 cfs year round use to 5.00 cfs for year round use. All three rights use the same four wells. Water right 63-10012 had a domestic use included in its water right. I am assuming this was for well # 4 and the waste treatment plant. However, I am including the waste treatment plant in the industrial use, since it is apart of the production facility. Therefore, the domestic use should be removed from the water right.

63-10012

RECOMMENDATIONS:

I recommend that this permit be licensed for 3.00 cfs to provide year round use of the facility.
This permit should allow a annual volume of 1603.3 AFA. This volume would be limited by the
number of days that the water is being used. The remainder of the volume for irrigation and fire
protection will be covered by water rights 63-7218. When all rights are combined this plant
should not divert more than 5.00 cfs and 1603.3 afa for industrial use.

2. Volume Calculations for Other Uses:

FLOW METER SHEET SHOWS A DAILY VOLUME OF 4.35 AF FOR TOTAL ANNUAL VOLUME OF 1588.7 AFA.

WASTE TREATMENT PLANT USES APPROXIMATELY 13,000 GALLONS PER DAY

13,000 GPD x 365 DAYS / 325850 = 14.6 AFA PER YEAR

IRRIGATION AND FIRE PROTECTION ARE COVERED UNDER OTHER RIGHTS. THEREFORE THE MAXIMUM ANNUAL VOLUME IS 1603.3 (1588.7 + 14.6 = 1603.3)

Dear Mr. Nelson:

Below is the information you requested in your July 25 Water Rights Licensing Exam.

- The pretreatment waste plant well is a 1 horsepower, 4-inch submersible rated at 21.5 gpm.
- The irrigation water is not metered. We have the ability to run 700 gpm in this system, but normally run below this.
- The fire well is not metered, but during a recent test it had 2,250 gpm peak flow.
- The process water is metered. The peak flow was March 3, 2000 at 2073 gpm. The peak daily flow was March 31, 2001 at 1,418,300 gallons.

If you have any questions or need additional information I can be reached at 442-4048.

Sincerely,

Burl Ackerman

REMARKS: The LIFT was Estimated at 15 FT.
This well is an artesian well, but pumps should
cause some drawdown. 15 FT. of drawdown
would be a minimal drawdown for an
artesian well. The pressure was also
estimated at 60 PSI. Between the
draw down & pressure, this theoretical
should give an average flow rate.

This theoretical was very close to
the pump's rating of 21.5 gpm.

This well is an ARTESIAN well, BUT THE

Section 1. Process Description

General Facility Description

Site Description

The J.R. Simplot plant is located in primarily industrial/agricultural area on the outskirts of town between Nampa and Caldwell, Idaho, adjacent to Interstate 84. The plant location is shown in Figure 1.

Process Description

J.R. Simplot plant processes potatoes into french fries and other processed frozen potato products. Potato processing operations occur 24 hours per day, 6-7 days per week, and an average of 48 weeks per year. The remaining time is used for sanitation and maintenance activities.

Raw materials (potatoes) are delivered from the fields, on-site storage or from remote storage facilities. The storages provide a controlled environment to maximize potato quality. The potatoes enter the plant via truck using two unloading stations, where they are cleaned and foreign debris is removed. The water used to clean the potatoes is reclaimed in silt bunkers and recycled. The water soaked debris and dirt from the silt bunkers is temporarily stored on site and hauled to suitable disposal areas. Any waste potato matter generated in the plant is sold commercially for livestock feed. Raw receiving personnel collect samples for both State and Plant raw product graders.

The potatoes are peeled in steam peelers followed by scrubbers that brush and wash off the peel. The potatoes are graded for size. From this point in the process, the raw material can follow one of two routes. The small potatoes are processed on the "Specialty Line" (Formed Line), the larger potatoes on the "Main Line". The Main Line produces french fries and Specialty Line produces the formed products. The process description that follows is for the Main Line (french fry line). The Specialty Line is very similar.

The potatoes are sent to the trim room for additional Quality Grading and Trimming, after which they are preheated in water to condition them for cutting into french fries. The cutting is accomplished using GRL cutters or water knives.

The french fries are then routed through a series of grading machines where small ones are removed and then on to automatic defect removal equipment. The auto-defect equipment removes defective french fries from the product stream then removes the defect, utilizing vision technology. Rejected material is sent to the Specialty Line or to the livestock feed storage bins.

Blanching is accomplished utilizing three steam heated blanchers. After blanching, the product is transferred to the dryer in a solution of water/Dextrose and sodium acid

pyrophosphate. The product is then placed in an air dryer to reduce the moisture content. Process controls include the retention time of the product, air temperatures and relative humidities.

After drying the product is transferred to the fryer, where it is placed on traveling screen that is immersed in hot oil. Process controls include retention time and oil temperature. Following the frying process, the product is cooled first in an ambient air cooler to about 120 F and then in a pre-cooler chamber down to about 70 F. This is followed by a freezing process where they are cooled down to about 0 F.

After exiting the freezer, the products are graded, packaged, inspected and placed into cold storage. They are then shipped, either to wholesale or retail customers.

Dan,

The attached file has the flows on the peak day. The readings are taken every 15 minutes. Let me know if you need additional information on this or have any questions.

Dan,

The attached file has the flows on the peak day. The readings are taken every 15 minutes. Let me know if you need additional information on this or have any questions.

Dear Mr. Nelson:

Below is the information you requested in your July 25 Water Rights Licensing Exam.

- The pretreatment waste plant well is a 1 horsepower, 4-inch submersible rated at 21.5 gpm.
- The irrigation water is not metered. We have the ability to run 700 gpm in this system, but normally run below this.
- The fire well is not metered, but during a recent test it had 2,250 gpm peak flow.
- The process water is metered. The peak flow was March 3, 2000 at 2073 gpm. The peak daily flow was March 31, 2001 at 1,418,300 gallons.

If you have any questions or need additional information I can be reached at 442-4048.

Sincerely,

Burl Ackerman

Hello Mr. Ackerman,

Thank you so much for the information that you sent. I am not sure how your flow meter is set up, but generally there is a way to get a printout of the readings taken on the day you listed as the peak water use day. I was hoping to get a printout of the readings for that day. I can use the information that you supplied, but I would have a difficult time defending the flow rate and volume without some data to back up this claim.

There are times that the field agent's recommendations are not followed, because there is not enough information to support the recommendation. I can perform theoretical calculations on the well pumps to support the flow rate, but it becomes much more difficult to support a volume calculation without some data available to back up your calculations.

Please let me know if you can send a spread sheet or some other form of the readings taken from the meter. If this is not possible I will do my best to support the volume that you listed in your email.

Thank you for your time and patience, and if you have any questions please don't hesitate to give a telephone call at 334-2190.

RE: Assignment of Permit 63-10012

Dear Permit Holder(s):

The department acknowledges receipt of correspondence changing ownership of the above referenced permit to you. The department has modified its records to reflect the change in ownership and has enclosed a computer-generated report for your records.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact the department if you have questions.

Sincerely,

Jeff Peppersack

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is approved.

If approved, this permit authorizes the construction of a well subject to the following conditions:

GENERAL CONDITIONS

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS

9. THIS DRILLING PERMIT REPLACES A WELL WHICH IS LISTED AS A POINT OF DIVERSION UNDER LICENSE NO. 63-7218 AND PERMITS NOS. 63-10012 AND 63-10066. WATER SHALL NOT BE DIVERTED FROM THE WELL THAT IS REPLACED, EVEN AS A BACK-UP SOURCE, UNTIL A TRANSFER OR AMENDMENT IS APPROVED BY THE DEPARTMENT ADDING A POINT OF DIVERSION

Dated this 22nd day of may, 1989. TO THE ABOVE MENTIONED WATER RIGHTS

Dear Permit Holder:

LAPSE NOTICE License Examination Fee

You are hereby notified that under the provisions of Section 42-217 and 42-218a, Idaho Code, the above referenced permit will lapse and be of no further force nor effect on June 30, 1987, for failure of the permit holder to submit either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Provisions of § 42-217, Idaho Code, and the Beneficial Use Examination Rules and Regulations provide that failure of the permit holder to submit either the fee or an acceptable field examination report within one (1) year and sixty (60) days after notification by the director that the submittal is due is cause for the director to reject the proof of beneficial use and lapse the permit. The Department notified you of the required submittal on April 30, 1986.

The lapsed permit can be reinstated upon a showing of reasonable cause for late submittal of proof of beneficial use, if you submit to the Department on or before August 28, 1987, either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Enclosed is a fee information sheet that must be completed and submitted to the Department to keep the permit in good standing. If you have questions, please contact any office of the Department.

EXAMINATION FEE REMINDER

Dear Permit Holder:

Earlier this year you were mailed a certified letter by our state office, which described a new law related to your water right permit. The water right permit to which this law applies is identified by the number at the top of the mailing label above. The purpose of this letter is to act as a reminder of the new law and to warn you that your permit is now losing priority daily.

As described in the certified letter, House Bill 671 enacted by the 1986 Idaho Legislature requires payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. The certified letter described the procedure for selecting the latter alternative, whereby you initially notify us regarding which water right examiner you have selected, and provide a statement from the examiner as verification.

The date of priority of your water right permit is now being delayed one day for each day the response is late. Also, if the fee or completed field examination report are not submitted within a year from the sixty-first day after the certified letter was mailed, the permit may be lapsed and rendered invalid. The fee, or notice that a private field examination will be conducted, should be submitted as soon as possible if you wish to maintain your permit in a valid status.

Enclosed please find an Examination Fee Information Sheet, with the License Examination Fee Schedule printed on the back. This sheet should be submitted if either the fee payment option or the private examination option is selected. If you have questions or desire assistance in this matter, please feel free to contact this office.

Sincerely,

David R. Tuthill Jr.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

DEAR PERMIT HOLDER:

ENCLOSED IS A COPY OF YOUR APPROVED APPLICATION FOR PERMIT. WE DIRECT YOUR ATTENTION TO THE CONDITIONS OF APPROVAL ON THE FOURTH PAGE.

BE SURE TO NOTE THE SPECIAL CONDITION REQUIRING YOU TO INSTALL A MEASURING DEVICE, OR AN ACCESS PORT TO PROVIDE FOR THE INSTALLATION OF MEASURING EQUIPMENT BY THE DEPARTMENT. ENCLOSED PLEASE FIND A LIST OF MEASURING DEVICE OPTIONS, AND SPECIFICATIONS FOR THE INSTALLATION OF THE ACCESS PORT.

PLEASE BE ADVISED THAT NUMEROUS PRIOR APPLICATIONS FOR PERMIT HAVE BEEN FILED TO APPROPRIATE WATER FROM YOUR SOURCE, TO BE USED ON DESERT LAND ENTRY AND/OR CAREY ACT LANDS. DEVELOPMENT OF THESE WATER RIGHTS IS CURRENTLY PREVENTED BY THE U.S. BUREAU OF LAND MANAGEMENT. HOWEVER, IF THE LANDS ARE RELEASED FOR DEVELOPMENT, THE ASSOCIATED WATER RIGHTS WILL RECEIVE WATER PRIOR TO YOUR WATER RIGHT ENCLOSED. THEREFORE BE SURE TO ANALYZE THE FUTURE IMPACT OF THESE RIGHTS BEFORE MAKING A MAJOR INVESTMENT IN A WATER SUPPLY SYSTEM.

WE HAVE ENCLOSED INSTRUCTIONS ENTITLED "MAKING PROOF OF BENEFICIAL USE". PLEASE READ THE INSTRUCTIONS CAREFULLY SINCE YOU MUST TAKE FURTHER ACTION TO DEVELOP THIS PERMIT. ALSO ENCLOSED FOR YOUR CONVENIENCE IS THE STATEMENT OF BENEFICIAL USE POSTCARD THAT MUST BE SUBMITTED WHEN YOUR PROJECT IS COMPLETED.
