1. jstanton 8/28/2002 Comment/Analysis

Comment: Amendment changes the pod to a new location on city property, as the original well did not provide potable water. Appears to be a routine change that could not be anticipated when original permit was filed. New site is right next to an existing city well, so that well is most likely to be affected by this change. Recommend approval.

2. jstanton 8/28/2002 Legal Notice Remarks

Comment: Amendment proposes to change the location of the new city well to the same location as existing city well #3, as the original well drilled under this permit did not provide water suitable for culinary purposes.
