

MEMORANDUM

TO: File 74-00179D - 100 Inches

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 4597

DATE: July 28, 1998

Note
Yellow
High lighted
Areas

Transfer 4597 could not be approved as proposed, transferring water only. Instead, the transfer approval document identifies both points of diversion and all 248.0 acres as a permissible place of use. The applicant may divert the amount of water he chooses at either point of diversion to irrigate a total of 121.5 acres under this right.

The region staff have informed me that Water District 74-C has been inactive for the last couple of years, the watermaster has not been appointed by the department, nor has the water district been bonded. No request was sent or response received regarding this transfer. The water district condition is applied to meet any future regulation by the district.

Recommended conditions include watermaster control, measuring devices/lockable controlling works, multiple points of diversion total limits, irrigation overlap, permissible place of use and standard transfer conditions.

Nate - Would you mind sending
A copy of this to Chris Bromley?
THANKS for your Help.

Dean
