Subject: RE: Bear Lake Sands water supply info

I would like an affidavit or an engineer's stamp on the documentation before I put my reputation on the line but IF I can believe the information depicted in the drawing, Bear Lake Sands Inc. will be issued license 11-7372 for some additional volume; no additional rate.

I need to discuss the volume numbers with the Bureau Chief, Jeff Peppersack. Because Department standard allots each stub-in a certain volume and rate as if it were a finished home, he is not comfortable signing a license for a subdivision where multiple lots and their stub-ins are taken up by one residence. That type of development subverts the standard and from what I see in aerial photography, East Shore may be that type.

In addition, IF the East Shore Water Company intends to add a new well to this system, they NEED to file an application for a well permit and an application for a transfer to add a point of diversion with IDWR. As I mentioned below, I spoke to Dennis Dunn from our Eastern Region office this morning. He is feeling some urgency to clean up or fix the family of Bear Lake Sands/East Shore water rights and he has not received the necessary forms to accomplish the changes he sees are imminent.

I don't know who to contact or who I need to encourage to complete those documents. Is that you? Or should I connect with Jack Balling again?
Michele

So where does this put the water right?

Lance

Mr. Anderson,
(and Mr. Ketterman,)

The IDWR's state office received this drawing of the Bear Lake Sands Water and Sewer System from Jack Balling last Friday. Although my copy doesn't have an engineer's stamp on it, (a side issue that I'll need to take up with Mr. Balling), I believe that it will aid me with processing a water right permit held Bear Lake Sands Inc.

I spoke to Dennis Dunn (IDWR Eastern Region) this morning. I understand that Dennis has been trying to keep both of you gentlemen informed of activity related to the Bear Lake subdivisions and he requested that I send a PDF copy of this drawing to you.

Questions? I will try to answer them.
Michele Edl
