Narrative in Support of Water Right Transfers for Greg Thain

Greg Thain desires to transfer a portion of water rights 36-2253 and 36-7971. The water right 36-2253 currently provides 4.31 cubic feet per second or 1212 acre feet annually of irrigation water to 303 acres of farm ground. The water right 36-7971 currently provides 1.16 cubic feet per second or 232 acre feet annually of irrigation water to 58 acres of farm ground.

The water right 36-2253 has a priority date of 3/03/1954 and the water right 36-7971 has a priority date of 3/31/1981. The desired transfer is due to an effort to provide irrigation water to fertile farm ground later in the growing season during a year of low water supply. Therefore, 43 acres or 172 acre feet per year will be transferred from both water rights. The transfer portions will offset each other and provide irrigation water to the transferred parcels of the two water rights. The period of use will remain 3/15 to 11/15 annually and the beneficial use of the two transfer portions will remain as irrigation water.

Based on calculations from the Eastern Snake River Plain Aquifer model it has been determined that no mitigation will be required due to the proposed transfers because the ratio of impact with transfer to impact without transfer above and below Milner Dam is less than the 5% limit. Depletion per river reach per year was estimated below 6 af/year.
