RE: PERMIT NO. 65-13961

Dear Mr. Jones:

The department acknowledges receipt of the Proof of Beneficial Use ("proof") form and the \$50.00 filing fee you filed. However, there is some information contained on the proof that is unclear or incomplete and that information may affect the license the department will issue. The next step is for the department to contact you to schedule a field examination to determine the rate of diversion and extent of the developed water right for the purpose of licensing the right.

According to your proof statement, you are diverting 30 gallons of water for stockwater of 1000 head of livestock. The department bases its license examination fee on a rate of diversion in cubic feet per second ("cfs"). A diversion of 30 gallons per minute equates to approximately 0.7 cfs, which the filing fee you paid would be appropriate. It appears that you were unable to develop full extent of the permitted uses of commercial and stockwater for a dairy. If you have completed those uses, you should file an amended proof statement.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office or at the department's website at: www.idwr.idaho.gov

If you have questions, please contact me at (208) 287-4942, or if you want to schedule the field examination please contact the regional office in Boise at (208) 334-2190.

Sincerely,

Deborah J. Gibson
Administrative Assistant
Water Management Division
